CATALYST 128 TAP CONFIGURED DIGITALLY PROGRAMMABLE POTENTIOMETER (DPP™)

◆ Surface Mount Device

Features:
- Potentiometer control and memory access via 2-wire interface (I2C-like)
- Nonvolatile memory storage for wiper settings
- Automatic recall of saved wiper setting at power up
- Special increment/decrement instruction mode for automatic trimming adjustments
- VCC operation from 2.7 V to 5.5 V
- V+ (Analog Voltage Supply) operation from +8 V to +15V
- Standby current less than 15 μA
- 100 year nonvolatile memory data retention
- Operating temperature of -40°C to + 85°C

RoHS Compliant

For quantities of 500 and up, call for quote.

CATALYST 256 TAP CONFIGURED DIGITALLY PROGRAMMABLE POTENTIOMETER (DPP™)

◆ Surface Mount Device

Features:
- Direct WRITE and READ wiper settings
- Buffered wipers
- Independent reference terminal inputs, CAT525
- Rail-to-rail output range
- Single supply operation: 2.7V to 5.5V
- 3-wire serial interface
- 8-bit resolution or 256 tap positions
- Four (4) independently addressable wipers
- Nonvolatile wiper position storage

RoHS Compliant

For quantities of 500 and up, call for quote.

CATALYST Supervisors and DC-DC Converters

RoHS Compliant **This page of product is compliant.**

CATALYST μP SUPERVISORY CIRCUITS WITH WATCHDOG TIMER AND SERIAL EEPROM

Supervisory Functions:

- Power Supply Voltage Supervisor
  - -Issues reset signal if power supply fails or is out of tolerance
  - -Insures μ C operates with power supply voltage
  - -Power-On reset and brownout protection
- Watchdog Timer (CAT1161, CAT1163)
  - -Restarts microcontroller/ASIC that has stalled because of a hardware or software failure

Memory Functions:

- 16K bit EEPROM Memory
- 400kHz I^2C Interface
  - -10ms maximum write time
  - -16 byte page write buffer
  - -Hardware write protection

Supervisor with Memory Advantages:

- Replaces two ICs with one
- Reduced PCB footprint by 50%
- Low cost

CAT1161 and CAT1163 Features:

- Watchdog monitors SDA signal (CAT1161)
- Watchdog timer input (WDI) (CAT1163)
- 400kHz I^2C bus compatible
- 2.7v to 6.0V operation
- Low power CMOS technology
- 16 byte page write buffer
- Built-in inadvertent write protection
  - -VCC lock out
  - -Write protect pin, WP
- Active high or low reset
  - -Precision power supply voltage monitor
  - -5V, 3.3V and 3V systems
  - -Five threshold voltage options
- 1,000,000 Program erase cycles
- Manual Reset
- 100 Year data retention
- 8-pin DIP or 8-pin SOIC

CAT1162 Features:

- No watchdog timer
- Lowest cost
- Other features same as CAT1161 and CAT1163

CATALYST μP SUPERVISORS WITHOUT EEPROM MEMORY

CAT809 and CAT810 Features:

- Direct replacements for the MAX809 and MAX810 in applications operating over the industrial temperature range.
- 6μA power supply current
- Power supply transient immunity

CAT811 and CAT812 Features:

- Direct replacements for the MAX811 and MAX812 in applications operating over the industrial temperature range.
- 6μA power supply current
- Power supply transient immunity

CAT1232LP and CAT1832 Features:

- Selectable reset voltage tolerance
  - -CAT1232LP for 5V supply
  - -Cat1832 for 3.3V supply
- Selectable watchdog period: 150ms, 600ms or 1.2 seconds
- Debounced manual push-button reset

CATALYST CAT660 DC-DC CONVERTERS

Features:

- 100mA output current
- 8-lead SO and DIP
- Charge pump: no inductor required
- Selectable frequency: 10kHz/80kHz
- Replaces Maxim Max660
- Replaces Linear Technology LTC 660
- New Thin TDFN package (4x4mm): 0.8mm maximum height

Quickfilter™
Technologies

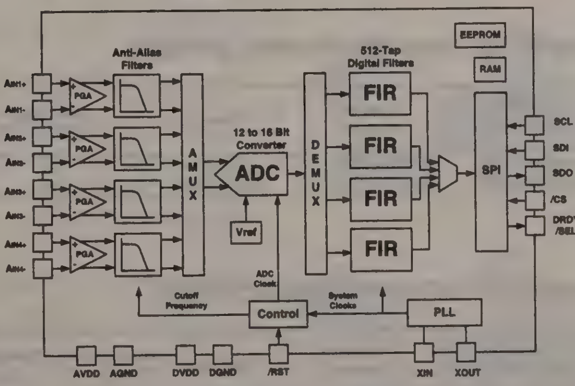
PROGRAMMABLE SIGNAL CONVERTER

Includes Precision Filtering For Sensors

The QF4A512 Programmable Signal Converter is a 4-channel, signal conditioner and signal converter. Each channel can be individually programmed for the gain, anti-aliasing filter cutoff frequency, A-to-D sampling frequency, and unique filter requirements. This is accomplished with 4 separate high-precision 512-tap FIR filters. Quickfilter software has been created for rapid device configuration and filter design at performance levels unattainable with analog components.

Features:

- 4 Channel Analog Differential or Single Ended Inputs
- 4 Programmable (1x, 2x, 4x, 8x) Gain Amplifiers
- Anti-Aliasing Filter Per Channel, 3rd Order Bessel
- 16-bit Programmable A/D Converter
- 16-bit resolution at 1.17Msps
- Internal Precision Voltage Reference
- 4 Individual Programmable 512-tap Digital FIR Filters
- 3 Wire SPI Port Interface
- 3.3V Digital I/O, 5 Volt Tolerant
- 4K Byte EEPROM for filter coefficient, chip configuration and calibration.
- 256 bytes of EEPROM User Data Space
- 384 Bit Masks for IEEE 1451.4 TEDS on 4 Channels
- 3.3V & 1.8V Supplies
- Industrial Temp -40°C to +85°C
- 32-Pin LQFP Package



Functional Block Diagram

FREESCALE Analog and Mixed Signal ICs

Products may be RoHS compliant.
Check mouser.com for RoHS status.

FREESCALE H-BRIDGES AND CONFIGURABLE SWITCHES

Freescale's H-Bridge and Configurable switches are a selection of devices that provide Half Bridge, Full H-Bridge and configurable High and Low side switch capabilities. The devices are designed to service automotive as well as consumer/battery power loads. SMARTMOS™ technology provides the low RDSON MOSFET switches and control logic.

For quantities 250 and up, call for quote.

FREESCALE HIGH-SIDE SWITCHES

These SMARTMOS™ devices provide one or more channels of low RDSON open source MOSFET output switches. Load and IC protection is provided for parameters such as over current, over temperature and over/under voltage. The low RDSON MOSFET(s) control high side switching for resistive and inductive loads.

For quantities 250 and up, call for quote.

FREESCALE LOW-SIDE SWITCHES

These devices provide load control switching to ground (low side) for resistive and inductive loads. Each of the devices provide multiple channels of open–drain MOSFET output switching using SMARTMOS™ technology for low RDSON and low power dissipation. Load and IC protection is provided for parameters such as over current, over temperature and over/under voltage.

For quantities 250 and up, call for quote.

Communication, Interface, Driver, Video and Touch Sensing ICs

RoHS Compliant **This page of product is compliant.**

OMRON ELECTRONIC COMPONENTS B6TS - CAPACITIVE TOUCH SENSING ICS

OMRON expands its switch product range by introducing the new touch sensor switch family B6TS which is based on a capacitive measurement principle:

- B6TS-04LT – 4 channel sensor
- B6TS-08NF – 8 channel sensor

Features:

- B6TS is 'Application Ready' The B6TS was developed to be highly tolerant of its working environment with adaptive features such as self teaching, auto threshold and intelligent filtering to meet the demands of most applications today. B6TS resists EMC and compensates continuously for long-term drift.
- The customer has the 'Freedom to Design' With the exception of a few rules of thumb you are limited only by your imagination. Panel designers are free to decide electrode size, shape, spacing etc. The design is quick and easy – simulation, pcb design, cover material design, assembly – Finished Panel Solution!
- 'Freedom in Material' You can make touch keys through any non-conducting panel material including plastic, rubber, glass, marble and wood. You can use low cost commercial PCB materials to create your designs. Most designs can be done on low cost single sided PCB like FR-2 or CEM-1.

Capacitive Touch Sensing IC's

For quantities of 500 and up, call for quote.

MOUSER STOCK NO.		Description	Supply Voltage	Price Each		
Mfr.	Mfr. Part No.			1	25	100
653	B6TS-04LT	4 channel sensor	3.0v - 5.5v	3.46	3.26	3.08
653	B6TS-08NF	8 channel sensor	4.5v - 5.5v	4.03	3.82	3.61

OMRON ELECTRONIC COMPONENTS EVALUATION KIT 'B6T WORKBENCH'

NEW! TECHNOLOGY

Includes:

- A PC tool to program custom parameters of the B6TS like: sensitivity adjustment, hysteresis, timing to judge a touch event, drift compensation, output mode selectable: a) momentary switching, b) latching switching, c) serial data via SPI interface
- RS232 to SPI interface board
- Demo Panel for either (4 , 8 or 12 channels) to have an application ready evaluation platform available. The demo panel can be used to immediately carry out investigations with different cover materials and geometries.
- Simulation Software - To evaluate the behavior of the custom panel design before making a PCB.
- Application Note - Touch panel reference design.

Enabling Serial Connectivity

ANALOG SWITCHES

- Wide Voltage Range
- Low R-on
- Fast Speed ton:10 to 30ns
- Broadband: 200 to 300 MHz
- Advanced packaging

For quantities of 500 and up, call for quote.

VIDEO SWITCHES

- High-bandwidth solutions
- Signal routing solutions for all video signals
- True bi-directional switching
- High quality and reliability with integrated ESD protection
- Compliant solutions based on third party "Authorized Testing Centers"

For quantities of 500 and up, call for quote.

LAN SWITCHES

- Supporting up to Gigabit Ethernet
- Backward Compatible to 10/100
- Bandwidths > 350 MHz per channel
- Low R-on and C-on
- Excellent Isolation & Unwanted Signal Rejection
- Used by Major Notebook Manufacturers

For quantities of 500 and up, call for quote.

PLX TECHNOLOGY PCI Bridges and USB Controllers

**Products may be RoHS compliant.
Check mouser.com for RoHS status.**

EXPRESSLANE™ PEX 8111 PCI EXPRESS TO PCI BRIDGE

The PEX 8111 can be used to quickly upgrade legacy PCI adapter board designs to be compatible with PCI Express standard interface slots. The PEX 8111 supports Reverse bridging, enabling designers to utilize the latest PCI Express silicon with widely entrenched PCI host systems. Reverse bridging allows the host processor to reside on the PCI bus; the PEX 8111 will accept configuration cycles from the PCI side and manage the PCI Express interface as a secondary entity within the PCI software model.

Specifications:
- Forward and reverse bridging
- 144-ball BGA package with standard
- 1.0 mm pitch (13mm x 13mm)
- Alternative fine-pitch BGA package (10mm x 10mm)
- Low power – 400 milliwatts
- EEPROM configuration option with SPI
- Internal 8Kbyte shared RAM
- 1.5 V core supply voltage
- Four (4) GPIO pins for max. design flexibility
- Extensive PME support including: D0, D0Active, D1, D2, D3Hot, and D3Cold
- x1 Link, dual-simplex, 2.5 Gbps per direction
- JTAG
- Lead-free packaging available
- PCI Express Base 1.0a compliant
- One virtual channel
- Automatic LVDS polarity reversal
- 128 byte maximum payload size
- Link CRC
- Link power management
- Flow control buffering
- PCI v.3.0: 32 bits, up to 66 MHz
- Internal arbiter supports up to 4 external masters; REQ#/GNT# signals
- PCI Power Management 1.1
- PCI Express transaction queues for eight (8) outstanding TLPs
- 3.3V I/O and 5V tolerant PCI
- Message Signal Interrupt (MSI) support
- Provides PCI clock output
- Four mailbox registers for messaging
- VGA and ISA Enable registers for legacy operation

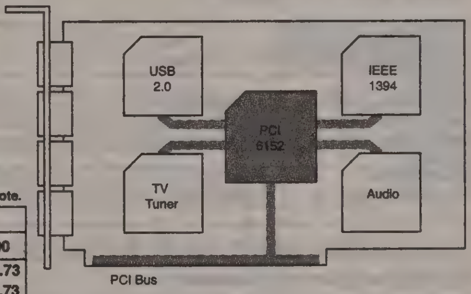
FASTLANE™ PCI 6152 PCI-TO-PCI BRIDGE

PLX's FastLane PCI 6152 family is specially designed for applications that require high performance 32-bit PCI bus expansion. Add-in card designers can use the FastLane PCI 6152 to expand PCI connection capacity beyond the limitation of a single PCI device. Designers can use the FastLane PCI 6152 to build multi-device PCI cards such as RAID controllers and other multimedia applications.

Features:
- 32-bit, 33MHz or 66MHz synchronous operation
- 5V signal tolerance
- 15mm x 15mm TBGA
- Transparent bridge function
- PCI Bus Types
- Support for 4 bus masters
- 66MHz is AGP 2X Port Compatible



For quantities of 500 and up, call for quote.

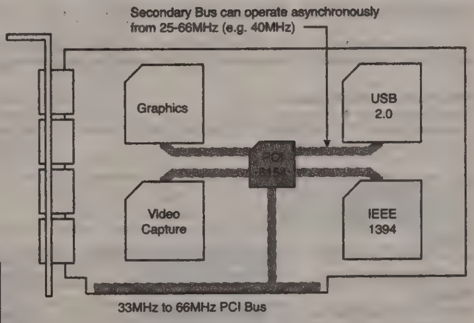
FASTLANE™ PCI 6154 ASYNCHRONOUS FASTLANE™ PCI–TO–PCI BRIDGE

The PCI 6154 (HB2) asynchronous 64-bit 66MHz PCI-to-PCI bridge is designed for high performance, high availability applications in bus expansions, programmable data transfer rate control, frequency conversions from slower PCI to faster PCI or from faster PCI to slower PCI buses. The PCI 6154 has sophisticated buffer management and buffer configuration options designed to provide customizable performance optimization.

Specifications:
- 64-bit, 33MHz-66MHz
- Asynchronous operation
- 5V signal input tolerance and 5V-3.3V signal conversions
- 31mm x 31mm PBGA
- 1KB FIFO size
- PCI Bus Types
- Transparent Bridge Function
- Support for 9 Bus Masters
- Flow-Thru™ architecture for higher PCI-to-PCI bridging efficiency
- Intel 21154 pin compatible, plus enhanced features
- Independent external clock input option for secondary port output clocks
- Large 1K Byte buffer for efficient PCI-to-PCI bridging & speed conversion
- 9 pairs of REQ/GNT signals support up to 8 bus masters directly on secondary bus
- EEPROM support for extra register control
- Vital Product Data (VPD)
- 4 general purpose IO interface
- PME D3 wakeup power



Secondary Bus can operate asynchronously from 25-66MHz (e.g. 40MHz)

NETCHIP™ 2272 16-BIT USB 2.0 HIGH-SPEED PROGRAMMABLE PERIPHERAL CONTROLLER

NetChip's NET2270 16-bit USB 2.0 high-speed programmable peripheral controller is optimized for single or bi-directional data transfer devices such as printers, scanners, digital cameras, mass storage, and audio products. NET2270, the latest addition to our General Purpose USB Peripheral Controller family, complements our flagship, world's first NET2290 32-bit USB 2.0 highspeed peripheral controller.

USB Transceiver:
- Supports Full Speed (12 MHz) or High Speed (480MHz)
- Serial data transmitter and receiver
- Parallel data interface to SIE
- Single parallel data clock output with on-chip PLL to generate higher speed serial data clocks
- Data and clock recovery from USB serial data stream
- SYNC/EOP generation and checking
- Bit stuffing/unstuffing; bit stuff error detection
- Logic to facilitate Resume signaling
- Logic to facilitate Wake Up and Suspend detection
- Ability to switch between FS and HS terminations/signaling

Endpoint FIFOs:
- 4 Choices of preset configurations
- 2 Kbytes of configurable FIFO memory for endpoints
- Supports max packet size up to 1K bytes, double buffered

Serial Interface Engine (SIE):
- Interface between FIFOs and USB transceiver
- CRC generator and checker
- Packet identifier (PID) decoder
- Forced error conditions
- USB 2.0 Test Modes

USB Protocol Controller:
- Host to device communication
- USB bit level protocol (Serial Interface Engine)
- Automatic retry of failed packets
- Up to 3 Isochronous, Bulk or Interrupt endpoints, each with a configurable FIFO
- Configurable Control Endpoint 0
- Interface to FIFOs
- Simulated disconnect signaling allows device controlled enumeration
- Software control of USB suspend and root port reset detection
- Software control of device remote wakeup
- Software control of root port wakeup

PLX TECHNOLOGY PCI I/O Accelerators

Products may be RoHS compliant.
Check mouser.com for RoHS status.

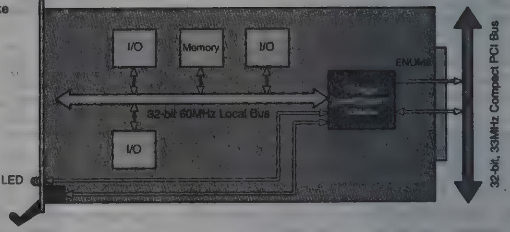
PLX Technology's PCI 9000 Series offers the most advanced, broadest range of general-purpose, PCI-to-local bus bridges available.
PLX Technology offers **two types of I/O Accelerators: Targets and Masters.** PCI Target I/O Accelerators support Direct Slave operations, allowing PCI bus master devices to access memory and other slave devices on a local bus. These 32-bit, 33MHz products include the PCI 9052 and PCI 9030. The PLX PCI Bus Master I/O Accelerators support Direct Slave operation, plus they add support for Direct Master operation, allowing processor/local bus master devices to access memory and other devices on the PCI bus. In addition, they support DMA, allowing masters on either bus to direct the chip to perform data transfers. The PCI Bus Master I/O accelerators from PLX Technology are ideal for intelligent peripheral devices and embedded hosts. The bus master products are available in 64-bit, 66MHz; 32-bit, 66MHz and 32-bit, 33MHz formats. These include the PCI 9656, PCI 9056 and the PCI 9054.

PCI-LOCALBUS 32-BIT TARGET I/O ACCELERATORS

PCI 9030 SMARTarget™ I/O Accelerator

The PCI 9030 with SMARTarget™ technology provides an array of features that define a new level of performance, flexibility and simplicity in PCI designs. A 32-bit, 33MHz PCI v.2.2-compliant device with burst transfers up to 132Mbytes/sec, the PCI 9030 delivers high performance to new PCI-based adapters and those migrating from legacy designs. The device's 60MHz local bus, 3V/5V operation, and programmable general-purpose I/Os (GPIOs) and chip selects bring unprecedented flexibility to a wide variety of memory and I/O devices. The combination of these features make adapters used in high-bandwidth applications, such as telecommunications and data communications interface cards, easier than ever to design.

Typical Compact PCI Hot Swap Adapter Card



9030 Performance Features:
- PCI v2.2 compliant 32-bit 33MHz Target Interface Chip enabling PCI Burst
- Transfers up to 132Mbytes/second.
- Up to 60MHz Local Bus operation enabling burst transfers up to 240Mbytes/second
- PCI Target Read Ahead Mode
- PCI Target Programmable Burst
- PCI Target Delayed Write
- Posted Memory Writes

PCI 9052 Target I/O Accelerator for Generic and ISA Local Bus Designs

The PCI 9052 provides low cost connectivity for PCI slave designs. It is specifically targeted at easing the transition of existing ISA designs to the more feature rich and performance oriented PCI bus. The PCI 9052 provides direct slave PCI functions by interfacing the adapter's I/O circuitry (control, address and data lines) to a host computer's microprocessor / memory architecture via the 32-bit PCI bus, which typically runs at 33 MHz.

9052 Performance Features:
- 32-bit, 33MHz PCI r2.1 compliant
- Up to 40MHz local bus operation
- ISA and Generic 32-bit, 40MHz local bus designs
- Glueless ISA interface for low cost adapters
- Supports multiplexed and non-multiplexed 8-, 16-, & 32-bit generic local buses
- 5V CMOS in 160-pin PQFP package
- PCI unlimited bursts transfers at up to 132MB/s
- Direct slave data transfers

PCI-LOCALBUS 32-BIT MASTER I/O ACCELERATORS

PCI 9054 Bus Master I/O Accelerator Chip

The PCI 9054 is a next generation 32-bit PCI bus mastering interface chip that seamlessly connects to and takes full advantage of Motorola's MPC860 PowerQUICC® and MPC850 microprocessors. The PCI 9054 I/O Accelerator, the industry's first CompactPCI® Hot Swap Friendly PCI interface chip, expands PLX's 32-bit PCI product line for CompactPCI® and PCI-based telecommunications, networking and other high-bandwidth systems.

9054 Performance Features:
- PCI v2.2 compliant 32-bit 33MHz Bus Master Interface Controller enables PCI Burst Transfers up to 132Mbytes/second
- General Purpose Bus Master Interface featuring an advanced Data Pip Architecture™ which includes two DMA engines, pro-grammable Target and Initiator data transfer modes and PCI messaging functions
- PCI v2.2 Power Management Spec compatible
- PCI v2.2 Vital Product Data (VPD) configuration support

PCI 9056 Master Chip I/O Accelerator Chip

The PCI 9056 Master Chip – 32-bit, 66MHz PCI I/O accelerator is the most advanced, 32-bit general-purpose bus mastering device available for Motorola MPC850/860 PowerQUICC and generic 32-bit, 66MHz local bus based designs. The PCI 9056 incorporates PLX's industry leading Data Pipe Architecture technology, featuring DMA engines, programmable Direct Master and Direct Slave data transfer modes, and PCI messaging functions.

9056 Performance Features:
- 32-bit, 66MHz PCI r2.2 compliant
- Motorola PowerQUICC and generic 32-bit, 66MHz local bus modes
- 3.3V I/O, 5V tolerant bus interfaces
- PICMG 2.1 r2.0 Hot Swap Silicon
- 256-ball, 17 x 17 mm, 1.00 mm fine pitch PBGA (FPBGA)
- PCI bus bursts to 264 MB/sec
- Local bus bursts to 264 MB/sec

For quantities of 500 and up, call for quote.

PCI 9080 I2O Compatible PCI Bus Master I/O Accelerator Chip

The PCI 9080 Master Chip is the standard in PCI I/O Accelerators. It incorporates all the features of the PCI 9060 Family of PCI products, while adding the options and features needed to keep ahead of the ever changing technology treadmill associated with PCI. In addition to providing the first processor independent I20 compliant messaging unit, the PCI 9080 is one of the first PCI interface chips to operate at both 3.3V and 5V.

PCI-LOCALBUS 64-BIT MASTER I/O ACCELERATORS

The PCI 9656 64-bit, 66MHz PCI I/O accelerator is the most advanced, general-purpose bus mastering device available for Motorola MPC850/860 PowerQUICC and generic 32-bit, 66MHz local bus based designs. The PCI 9656 incorporates PLX's industry leading Data Pipe Architecture technology, featuring DMA engines, programmable Direct Master and Direct Slave data transfer modes, and PCI messaging functions.

Features:
- 64-bit, 66MHz PCI r2.2 compliant
- Motorola PowerQUICC and generic 32-bit, 66MHz local bus modes
- 3.3V I/O, 5V tolerant bus interfaces
- PICMG 2.1 r2.0 Hot Swap Silicon
- 272-ball, 27 x 27 mm, 1.27 mm pitch PBGA
- Zero wait state burst operation PCI bus bursts to 528 MB/sec Local bus bursts to 264 MB/sec
- 2 DMA Channels Block and Scatter/Gather transfers DMA descriptor ring management Demand Mode and EOT Hardware controls GA
- PCI D3COLD Power Management Event (PME) generation support
- I2O r1.5 messaging unit
- Eight mailbox and two doorbell registers
- PCI arbiter supports 7 external masters
- Host mode reset/interrupt signal configuration

For quantities of 500 and up, call for quote.

Silicon Laboratories' wireless solutions are the world's most integrated, robust, reliable and easiest to use wireless solutions available in the GSM/GPRS market today. By eliminating more discretes and requiring fewer external components than alternate solutions, Silicon Laboratories' products empower our customers to add value-rich features and speed time to market. Best of all, Silicon Laboratories' develops and designs these world-class products in proven, standard CMOS process technology. Generate high-frequency signals used in wireless communication devices.

SILICON LABORATORIES ISOMODEM™ EMBEDDED MODEMS

Silicon Laboratories' embedded modem solutions are most feature rich, compact and flexible 2400 baud modems on the market. Available in two 16-pin SOIC packages, the SI2401 and SI2400 embedded modem solutions eliminate the need for a separate DSP data pump, modem controller, codec, isolation transformer, relay, opto-isolators and 2-4 wire hybrid.

Features:

- Simple AT command UART interface
- Globally compliant line interface
- Line-in-use and parallel phone intrusion detection
- Caller ID detection and decode

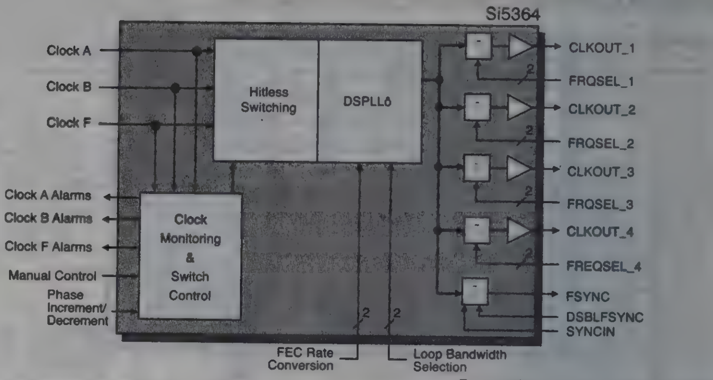
SILICON LABORATORIES Transceivers, Clocks & Audio Codec

Silicon Laboratories, based in Austin, Texas, designs and develops analog-intensive, mixed-signal integrated circuits (ICs) for a broad range of applications. Silicon Laboratories' diverse portfolio of highly-integrated, patented solutions is developed by a world-class engineering team with decades of cumulative expertise in mixed-signal technology.

Silicon Laboratories' diverse portfolio of both application specific and general purpose products serves a broad set of markets and applications. Silicon Laboratories' product portfolio includes high-performance microcontrollers, Aero™ GSM/GPRS transceivers, GSM/GPRS power amplifier, RF synthesizers, silicon direct access arrangements (DAAs), ISOmodem® embedded modems, ProSLIC® subscriber line interface circuits, DSL analog front end ICs, voice codecs, SiPHY™ optical networking transceivers, clock and data recovery ICs and precision clock ICs. Silicon Laboratories' solutions are designed into consumer, industrial, automotive and communications products worldwide including wireless handsets, digital video recorders and central office equipment.



SILICON LABORATORIES PRECISION CLOCK

Features:

- Jitter generation less than 0.3 psRMS (typ OC-192)
- Forward and reverse FEC clock scaling
- Selectable loop filter bandwidths

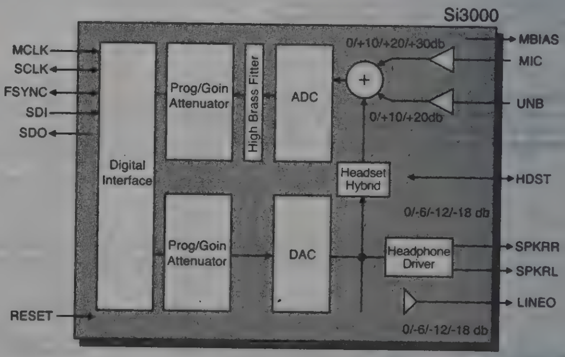
SILICON LABORATORIES CODEC FOR VOICE APPLICATIONS

Silicon Laboratories' Si3000 is a highly integrated, programmable, feature rich, and low cost voice band audio CODEC. Applications include handsets and speakerphones for computer telephony, PC modems, web phones, and Fax/MFP machines. The Si3000's digital interface allows direct connection to Silicon Laboratories' serial interface DAAs, or to a wide range of DSPs. Available in a 16-pin SOIC package, the Si3000 dramatically reduces external BOM components such as speaker drivers, bias circuits, and the handset hybrid to reduce total solution cost.

Features:

- Integrated microphone amplifier
- Integrated headphone and speaker drivers
- Integrated handset hybrid
- Serial interface for direct connection to DSP or a Silicon DAA



For quantities of 500 and up, call for quote.

Products may be RoHS compliant.
Check mouser.com for RoHS status.

SMSC
SUCCESS BY DESIGN

ETHERNET CONTROLLERS

Features:
- Lower system costs and overhead by eliminating the need for a PCI bus.
- Comprehensive set of tools for implementation of Non-PCI Ethernet connectivity.
- Dependable supply source with thirty plus years supporting long product cycles.
- Ethernet controllers offer lower system costs and overhead by eliminating the need for a PCI bus.

For quantities of 250 and up, call for quote.

ARCNET CONTROLLERS

ARCNET has many characteristics that make it ideal for industrial and embedded networking environments. This is due to the deterministic nature of ARCNET, its high reliability and fault tolerance, and its adaptability to a wide variety of cabling media and configurations. SMSC is the market leader in ARCNET devices and has a full spectrum of solutions to meet any customer's price and performance needs.

Some of the key features are minimal Software Requirements and Low Processor Overhead, Fast and Deterministic Performance, A43Logical Ring, Robust Message Passing, Automatic Reconfiguration, Broadcast Messages, Unmatched Cabling Options, Flexibility for Long Networks, Network Interface Modules, Use of Hubs, Passive Hubs, Active Hubs, Applying ARNET.

For quantities of 250 and up, call for quote.

MOUSER STOCK NO.	SMSC Part No.	Package	RAM	Data Rate	Operating Temp Range	Price Each

USB HUB CONTROLLERS

NEW FROM SUPPLIER

Features:
- Ensured compliance with international ESD standard (IEC61000-4-2 Level 4)
- Low capacitance, suitable for high-speed signal lines

For quantities of 250 and up, call for quote.

MOUSER STOCK NO.	SMSC Part No.	Package	Transfer Rate (USB 2.0)	Port Hub	Input Tolerance	Volt I/O	Price Each		
							1	25	100
886-USB2502-AEZG	USB2502-AEZG	36 QFN	480Mbps	2-Port	5V	3.3 Volt	4.75	3.05	2.68

USB TRANSCEIVERS

Features:
- Includes full support for the optional On-The-Go (OTG) protocol
- Functional as a host, device or OTG PHY
- Internal 1.8 volt regulators allow operation from a single 3.3 volt supply

For quantities of 250 and up, call for quote.

MOUSER STOCK NO.	SMSC Part No.	Package	Interface	Operating Temperature	Price Each		
					1	25	100
886-USB3300-EZK	USB3300-EZK	32 Pin QFN	USB 2.0 ULPI	-40°C to +85°C	2.15	1.35	1.15

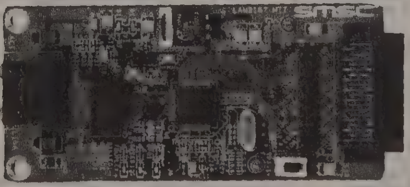
EVALUATION BOARDS



Features:
- Easy use software development boards.
- Enables a flexible and modular system design.
- Deterministic and reliable protocol.

For quantities of 25 and up, call for quote.

MOUSER STOCK NO.	SMSC Part No.	Product Family	Description	Price Each

STMICROELECTRONICS DRIVER EVALUATION BOARDS

With these evaluation board you'll be able to evaluate these devices when driving a three phase brushless DC motor with three hall-effect sensors. Screw connectors provide connection to motor supply rail and 5 V reference for the logic inputs, as well as the four outputs to motor windings. They can also be hooked-up to PractiSPIN interface board (EVALpractiSPIN) through a 34-pin connector. They can also be run also in stand-alone mode: four on board switches are used to select direction of the rotation, enable and disable braking or choosing to run in torque or speed mode.

STMICROELECTRONICS SURFACE MOUNT RESET CIRCUITS

These reset circuits are low-power supervisory devices used to monitor power supplies. They perform a single function; asserting a reset signal whenever the VCC supply voltage drops below a preset value and keeping it asserted until VCC has risen above the preset threshold for a minimum period of time.

- Two output configurations: Push-pull RST output (STM809/811)
  Push-pull RST output (STM810/812)
- Precision Monitoring of 3V, 3.3V and 5V supply voltages
- 140ms reset pulse width (min)
- Low supply current - 6uA (typ)
- Lead-free package

For quantities 500 and up, call for quote.

SURFACE MOUNT ACCELEROMETERS

NEW FROM SUPPLIER

STMicroelectronics, a leading supplier of MEMS (Micro-Electro-Mechanical System) devices announces a new solution extending its family of ultra-compact 'low-g' linear accelerometers. This 2 Axis ultra-compact square footprint and low power consumption makes the LIS244AL motion-sensing device ideally suited for battery-powered portable applications incorporating a robust, dual-axis MEMS sensor. It combines the CMOS interface chip providing two simultaneous, real-time analog outputs. The LIS244AL provides acceleration values at a very low noise level with minimized power consumption housed in an inexpensive 4 x 4 x 1.5 mm3 plastic package to fit in a variety of space-constrained applications. It also has an ultra-compact robust design provides shock survivability up to 10,000g with a full range scale output range of ±2.0g. The built-in self-test facility allows the user to verify both the mechanical and electrical parts of the device.

For quantities of 500 and up, call for quote.

MOUSER STOCK NO.	STM Part No.	Package Type	Resolution		Supply Voltage (V)	Supply Current Typ/Max (mA)	Price Each		
			(mg)	Bandwidth			1	10	100

ST's low-power three axes linear accelerometer LIS3L02AS4 includes a sensing element and an IC interface able to take the the information from the sensing element and to provide an analog signal to the external world. The sensing element, capable of detecting the acceleration, is manufactured using a dedicated process developed by ST to produce intertial sensors and actuators. The IC interface is manufactured using a standard CMOS process that allows high level of integration to design a dedicated circuit which is trimmed to better match the sensing element characteristics. The LIS3L02AS4 has a user selectable full scale of 2g, 6g and capable of measuring accelerations over a bandwidth of 1 1.5KHz for all axes.

For quantities of 500 and up, call for quote.

SURFACE MOUNT ANALOG TO DIGITAL CONVERTERS

These dual-channel, 12-bit analog-to-digital converter (ADC) chips that combine high and extremely low power consumption, achieving the industry's highest ratio of speed-to-pwer consumption performance. The TSA1203 performs 40 million MSPS while consuming just 230mW. The TSA1204 runs at 20MSPS while consuming only 120mW. By using multiplexed outputs, the TSA1203 and TSA1204 propel data-conversion product line into the twin-channel ADC arena.

For quantities of 500 and up, call for quote.

The TDA7535 is a stereo, digital-to-analog converter designed for audio application including digital interpolation filter, a third order multibit Delta-Sigma DAC a third order Chebyshev's reconstruction filter and a differential to single ended output converter. This device is fabricated in highly advanced CMOS, where high speed precision analog circuits are combined with high density logic circuits. The TDA7535, according to standard audio converters, can accept any I2S format.

For quantities of 500 and up, call for quote.

SURFACE MOUNT ANALOG SWITCHES

These high-speed analog S.P.D.T. switches are fabricated in silicon gate C2MOS technology. They are designed to operate from 1.65V to 4.3V, making them ideal for portable applications. They offer low ON-Resistance. The nIN inputs are provided to control the switches. The switches nS1 are ON when the nIN input is held low and OFF (high impedance state exists between the two ports) when IN is held high.

For quantities of 500 and up, call for quote.

The STG3699A is a high-speed CMOS low voltage quad analog S.P.D.T (Single Pole / Dual Throw) switch or 2:1 Multiplexer/Demultiplexer Switch fabricated in silicon gate C2MOS technology. It is designed to operate from 1.65v to 4.3v, making this device ideal for portable application. It offers very low ON-Resistance at 3.0v. It is available in commercial temperature range (-40 to 125°C).

For quantities of 500 and up, call for quote.

STMICROELECTRONICS H-BRIDGE DRIVERS

The VNH2SP30-E is a full bridge motor driver intended for a wide range of automotive applications. The device incorporates a dual monolithic high side driver and two low side switches. The high side driver switch is designed using STMicroelectronic's well known and proven proprietary VIPower MO technology which permits efficient integration on the same die of a true Power MOSFET with an intelligent signal/protection circuitry.

For quantities 500 and up, call for quote.

STMICROELECTRONICS THRU HOLE ELECTRONIC IGNITION DRIVERS

The VB921ZVFI is a monolithic high voltage integrated circuit made using the STMicroelectronics VIPower M1-2 technology, which combines a vertical current flow power trilinton with a coil current limiting circuit and a collector voltage clamping. The device is particularly suitable for application in high performance electronic car ignition, where coil current limitation and voltage clamping are required.

- 6 Amp up to 12 Amp coil current drivers
- 400 volt typical clamping voltage
- Built-in protection, current limiting
- Voltage and current flags

For quantities 500 and up, call for quote.

STMICROELECTRONICS SWITCH MODE POWER SUPPLIES

ST's revolutionary VIPer series of off-line switch mode power supply regulators combines an optimized, high voltage, avalanche rugged Vertical Power MOSFET with state-of-the-art PWM circuitry. The result is truly innovative AC to DC conversion that is simpler, quicker and - with component count halved - less expensive. Printers, Scanners, Digital Satellite Receivers, Digital Video Disks, Auxiliary Power Supplies, Battery Chargers, VCRs, TVs, White Goods and a host of other products can now be brought to market in shorter times and at lower cost. In addition to benefits such as adjustable switching frequencies up to 200 kHz, optimized current mode control and comprehensive built-in protection circuits, the VIPer family represents the easiest solution to comply with the "Blue Angel" and "Energy Star" Eco Norms, with extremely low total power consumption from the mains when the system is in stand-by mode.

- 100W, 50W, 20W, 10W output power
- 1.1 to 30 ohm power output RDS(on)
- 400V, 620V 700V and 730V breakdown voltages
- Avalanche rugged

For quantities 500 and up, call for quote.

STMICROELECTRONICS HIGH SIDE DRIVERS

Integrated High Side Drivers offer numerous advantages over the electromechanical relays used in cars today. Diagnostic information output from these devices helps the on-board microprocessor to quickly identify and isolate faults saving repair time and improving safety. ST is promoting VIPower solid-state relays belonging to the latest M0-3 technology, which allow smaller devices with less heat dissipation.

- Single, Double, Triple or Quadruple Channel
- 40V to 60V breakdown voltage
- 4A to 60A load current

For quantities 500 and up, call for quote.

STMICROELECTRONICS SURFACE MOUNT MICROPROCESSOR SUPERVISORS

These ST microprocessor supervisors offer a mix of reset timing for Power-On Reset, Watchdog, Manual Reset Input, and PFI-PFO (Early Power-fail Warning) in 8-pin packages.

- Push-pull reset outputs
- 150ms reset pulse width (min)
- Manual reset input
- Power-fail comparator (PFI/PFO)
- Low supply current - 40uA (typ)
- Lead-free package

For quantities of 500 and up, call for quote.

STMICROELECTRONICS DUAL-LOW VOLTAGE POWER AMPLIFIERS

These dual low-voltage power amplifiers are intended for use as a dual audio power amplifier in portable cassette players, radios and CD players. They can also be used in a solid-state MP3 player (other components required would be MPEG decoder, flash memory, low-cost microcontroller and DC-DC-converter).

- Supply voltage down to 1.8V
- Low quiescent current
- Low crossover distortion
- Bridge or stereo configuration

For quantities of 500 and up, call for quote.

STMICROELECTRONICS RTC, Non-Volatile RAMs and Supervisors

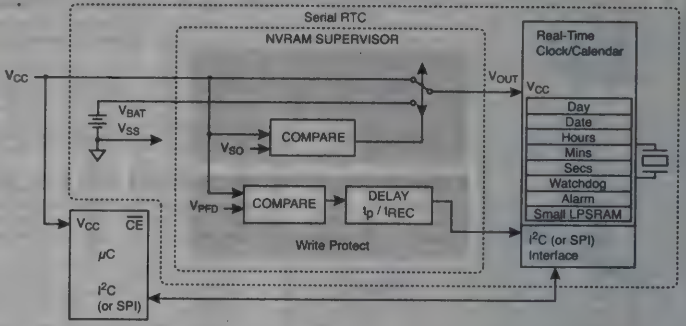
RoHS Compliant **This page of product is compliant.**

SERIAL REAL-TIME CLOCKS (RTC)

Real-Time Clocks keep track of day, date, and time including century, year, month, hour, minutes, and seconds. Many include Battery Switchover circuits, enabling them to keep time even when power is off. Other timekeeping functions offered include Alarm and Watchdog, and a calibration register supports high accuracy requirements.

RTC options include supervisory functions such as Power-on Reset/Low-Voltage Detect, Early Power-Fail Warning, Battery Monitor, and more. Some parts such as the M41ST85 Non-Volatizor can be used as NVRAM Supervisors by providing Battery Switchover and Write Protection for external Low-Power SRAMs.

ST's popular Serial RTCs support both SPI and I2C busses, and come in packages ranging from QFN16 and TSSOP8 to ST's SNAPHAT® with removable/replaceable battery.



RoHS Compliant

For quantities of 250 and up, call for quote.

SUPERTEX HOTSWAP CONTROLLER/IN-RUSH CURRENT LIMITER/CIRCUIT BREAKER INTEGRATED CIRCUITS

HV1xx and HV3xx hotswap product families are designed to control the inrush current while eliminating any undesirable glitches resulting from hot insertion of the circuit cards into live backplanes. The award winning HV1xx, requires no external components, except a single pass element to operate. It utilizes an innovative and proprietary design that normalizes the hotswap period, regardless of pass element and load capacitor resulting in consistent hotswap operations. The HV3xx families offer programmable inrush control, programmable circuit breaker current (internal 100mv sense) as well as programmable input under and over voltage thresholds. An open drain Power Good (PWRGD) signal is generated once all conditions have been satisfied.

HV100/101 Features:

- Top 100 products EDN magazine
- Industry first 3 pin hotswap controller
- MOSFET Auto adapting circuit
- Safe Hotswapping on backplane power supply rail
- Patent pending short circuit protection
- For Evaluation/Design Shortcut see Demo Boards

SUPERTEX LINEAR REGULATOR INTEGRATED CIRCUITS

The LR6 is a high-input voltage linear regulator for simple functions such as SMPS start-up and high-voltage line conditioning/regulation. The LR7 is a high-input voltage SMPS start-up circuit. The LR8 has an adjustable output voltage. The SR036 and SR037 are dual output, off-line regulators. The LR12 is a high voltage, low output current, adjustable linear regulator. It has a wide operating input voltage range of 13.2V to 100V.

RoHS Compliant

- For Evaluation/Design Shortcut see Demo Boards

* Dual output, off-line regulator

SUPERTEX MOSFET DRIVERS

High Voltage

These are a family of single high voltage, low input current isolated drivers utilizing Supertex's proprietary HVCMOS® technology. They are designed to drive descrete MOSFETs configured as high side switches up to 400V. They do not require any external power supplies.

RoHS Compliant

For quantities of 2000 and up, call for quote.

SUPERTEX RELAY DRIVER INTEGRATED CIRCUITS

The Supertex HV9901 is a BiCMOS/DiMOS universal relay driver that employs PWM switching techniques. It is designed for efficient and energy-saving operation of a low voltage relay with supply voltages ranging from 10-450V DC through utilization of the relay coils' inductance.

Source/Sink Outputs - Push-Pull

SUPERTEX HIGH VOLTAGE ANALOG SWITCH/MULTIPLEXER INTEGRATED CIRCUITS

These are low charge injection 8 or 16-channel high-voltage analog switch integrated circuit (IC) intended for use in applications requiring high voltage switching controlled by low voltage control signals, such as ultrasound imaging and printers.

Features:
- HVCMOS technology for high performance
- Very low quiescent power dissipation-10μA
- Output On-resistance typically 22 ohms
- Low parasitic capacitances
- DC to 10MHz analog signal frequency
- -60dB typical output off isolation at 5MHz
- CMOS logic circuitry for low power
- Excellent noise immunity
- On-chip shift register, latch and clear logic circuitry
- Flexible high voltage supplies
- Surface mount package available

RoHS Compliant

For quantities of 2000 and up, call for quote.

SUPERTEX HIGH VOLTAGE ARRAY AMPLIFIER INTEGRATED CIRCUITS (MEMS DRIVER ICS)

HV25x family of high voltage amplifiers is designed for the next generation of Micro Electro Mechanical Systems (MEMS). The family features 32-channel non-inverting high voltage Amplifier Arrays capable of output swings up to 295V. To minimize external components, the amplifiers have fixed internal closed loop gain setting resistors. Supertex is the industry's first company to combine an array of low voltage sample-and-hold circuits with high voltage amplifiers on the same chip.

SUPERTEX ELECTRONIC LINE SWITCH INTEGRATED CIRCUITS

These electronic switch ICs are designed as a replacement for the typical mechanical hook switch or electromechanical relays in telephones and answering machines. Multiple low-level inputs are provided for design versatility and may be controlled directly from logic circuitry or from mechanical switches. These ICs are line-powered and are especially useful in applications that require telephone operation when external power is lost or otherwise unavailable.

SUPERTEX HIGH VOLTAGE RING GENERATOR INTEGRATED CIRCUITS

The use of Supertex's high voltage push-pull IC technology allows these products to control high voltage outputs without the use of step-up transformers. Use of class-D PWM amplifiers in these ICs allows very high efficiencies to be achieved. This is particularly important for short and medium loop telecommunication applications where central telephone office power is not available.

SUPERTEX LED DRIVER IC DEMO BOARDS

MOUSER STOCK NO. Mfr. Mfr. Part No.	Description	Price Each
689–HV9903DB1	Contains all the necessary circuitry to demonstrate the features of the HV9903 white LED driver	**70.00**
689–HV9910DB1	Off-line, high brightness LED driver demo board. It contains all the necessary circuitry to test the performance of the HV9910 as a constant current driver to drive a string or multiple strings of LEDs	**150.00**
689–HV9910DB2	Universal off-line high brightness LED driver demo board. The board can be used to test the performance of HV9910 as a constant driver to power a string or multiple strings of LEDs	**150.00**
689–HV9910DB3	Low volt., hi brightness LED driver demo board. Board can be used to test the performance of the HV9910 as a constant driver to power LEDs	**90.00**
689–HV9911DB1	High brightness boost LED driver demo board. The demo board is capable of driving up to 20 one-watt LEDs in series from an input of 21-27VDC. The demo board uses the HV9911 in a boost topology.	**150.00**
689–HV9921DB1	Universal off-line LED driver demo board. The demo board is a complete LED power driver to supply a string of string of LEDs using the HV9921, an integrated 3-pin high input voltage constant-current buck regulator IC	**90.00**
689–HV9922DB1	Universal off-line LED driver demo board. The demo board is a complete LED power driver to supply a string of string of LEDs using the HV9922, an integrated 3-pin high input voltage constant-current buck regulator IC	**90.00**
689–HV9923DB1	A complete LED power driver demo board that can supply a string of LEDs using the HV9923 driver IC. It integrates a 500V switching MOSFET and can operate directly from the rectified universal AC line voltage range of 80 to 264VAC	**90.00**
689–HV9930DB1	High brightness LED driver demo board. The board uses an LED driver that is capable of driving up to 7 1-watt LEDs in series from an automotive input of 9 to 25 VDC. The demo board uses Supertex's HV9930 in a boost-buck topology.	**90.00**
689–HV9930DB2	High brightness boost-buck LED driver demo board. The demo board uses an LED driver that is capable of driving 4 3-watt LEDs in series from an input of 9 to 25 VDC. The demo board uses Supertex's HV9930 in a boost-buck topology.	**90.00**
689–HV9931DB1	A universal input non-isolated constant current source for powering a strings of high-bright LEDs. It operates from the universal 90-260VAC range and accepts an external PWM dimming signal for controlling the duty ratio of the output current.	**200.00**

SUPERTEX EL BACKLIGHTING DRIVER INTEGRATED CIRCUITS AND DEMO BOARDS

◆ **Surface Mount Device**

Applications:

- Pagers - HV823, HV826, HV830, HV850
- Portable Instrumentation - HV809, HV823, HV830, HV835, HV843, HV845, HV850, HV857L
- Global Positioning Systems (GPS) units - HV823, HV830, HV833, HV857, HV860
- LCD backlighting - HV833, HV835, HV843, HV845, HV857, HV857L
- Mobile cellular phones - HV823, HV826, HV830, HV835, HV843, HV845, HV850, HV857, HV857L, HV860
- PDAs - HV809, HV823, HV830, HV833, HV857, HV860
- Wireless handheld - HV835, HV843, HV845, HV857, HV857L, HV860
- Portable Transceivers - HV826, HV833, HV850
- Remote Control Units - HV826, HV833
- Calculators - HV826, HV833
- Electronic personal organizers - HV809, HV830
- Display Signs - HV809
- Dual segment lamps - HV835, HV843, HV845
- MP3 players - HV850
- Watches - HV850

HV809 Features
Input voltage up to 200V DC, 400V peak-to-peak output voltage, output load up to 350nF (100 in2 for 3.5nF/in2 lamp), adjustable output lamp frequency, adjustable On/Off pulsing frequency

HV823 Features
180V peak-to-peak output voltage, large output load capability, adjustable output lamp frequency, adjustable converter frequency, enable/disable function, low current draw under no load condition.

HV826 Features
1.8V to 3.5V operating supply voltage, adjustable output frequency, adjustable switch frequency, output voltage regulation, enable/disable function

HV830 Features
2.0V to 9.5V operating supply voltage, 200V peak-to-peak typical output voltage, large output load capability, permits the use of high-resistance elastomeric lamp connectors, adjustable output lamp frequency, adjustable converter converter frequency, enable/disable function, low current draw under no load condition, very low standby current

HV833 Features
1.8V to 6.5V operating supply voltage, separately adjustable lamp and converter frequency, <100nA shutdown current, output voltage regulation, enable/disable function, output timing for high efficiency

HV835 Features
Low audible noise, independent input control for lamp selection, 160V peak-to-peak output voltage, split supply capability, output timing, low shutdown current, wide input voltage range, output voltage regulation, no SCR output

HV843/HV845 Features
Low audible noise, independent input control for lamp selection, 180V peak-to-peak output voltage, split supply capability, output timing, low shutdown current, wide input voltage range, output voltage regulation, no SCR output

HV850 Features
Designed to drive EL lamps of up to 2.0in2, with capacitive values up to 4.5nF, no external components needed when using an external EL clock frequency, low noise and enable function

HV857/HV857L Features
Audible noise reduction, lamp aging compensation, wide input voltage range, 190V peak-to-peak output voltage, single cell lithium ion compatible, 150nA shutdown current, separately adjustable lamp and converter frequencies, output voltage regulation, split supply regulation

HV860 Features
Adjustable out regulation for dimming, 220V peak-to-peak output voltage, single cell lithium ion compatible, 150nA shutdown current, separately adjustable lamp for converter frequencies, split supply capability selection, 160V peak-to-peak output voltage, split supply capability, output timing, low shutdown current, wide input voltage range, output voltage regulation, no SCR output

RoHS Compliant

THAT Corporation INGENIUS® BALANCED LINE RECEIVERS

The 1200-series balanced line receivers overcome a serious limitation of conventional balanced input stages: poor common mode rejection. While conventional input stages measure well in the lab and perform well on paper, they fail to live up to their CMRR specs when fed from even slightly unbalanced source impedances — a common situation in pro sound environments. This is because conventional stages have low common-mode input impedance, which interacts with imbalances in source impedance to unbalance common-mode signals, making them indistinguishable from desired, balanced signals.

RoHS Compliant

For quantities of 100 and up, call for quote.

THAT Corporation BALANCED LINE RECEIVERS

THAT Corporation offers a family of self-contained differential amplifiers preconfigured for gains of 0, ±3, and ±6dB, intended primarily for use as audio balanced line receivers. These parts offer great audio performance with decent common-mode rejection, at a price that makes them an attractive, space-saving alternative to conventional op-amps.

RoHS Compliant

For quantities of 100 and up, call for quote.

THAT Corporation AUDIO AMPLIFIERS

The THAT 1510 and 1512 are high performance audio preamplifiers suitable for microphone preamp and bus summing applications. Gain is adjustable via one external resistor, making it possible to control gain over a wide range with a single-gang potentiometer.

RoHS Compliant

For quantities of 100 and up, call for quote.

THAT Corporation BLACKMER® VOLTAGE CONTROLLED AMPLIFIERS

THAT Corporation Blackmer VCAs are characterized by an exponential control characteristic (gain varies directly in decibels -- dBs -- with control voltage), extremely wide dynamic range, and low signal distortion. Our latest designs are particularly neutral in sound, imparting little or no coloration to audio signals in and of themselves.

RoHS Compliant

For quantities of 100 and up, call for quote.

THAT Corporation MATCHED TRANSISTOR ARRAYS

The THAT 300 series are large-geometry, 4-transistor, monolithic NPN and/or PNP arrays exhibiting both high speed and low noise, with excellent parameter matching between transistors of the same gender. With typical base-spreading resistances of 25 ohms for the PNP devices (30 ohms for the NPNs), their low voltage noise of under 1 nV/Hz1/2, the 300 series are ideally suited for low-noise amplifier input stages.

RoHS Compliant

For quantities of 100 and up, call for quote.

THAT Corporation OUTSMARTS™ BALANCED LINE DRIVERS

The THAT 1606 and 1646 are a new generation of monolithic audio differential line drivers offering improved performance over conventional cross-coupled designs. Based on a high-performance, fully differential opamp and laser-trimmed thin-film resistors, both families exhibit low noise and distortion, high slew rate, and wide output swing. The parts are stable when driving difficult loads, and have short-circuit protected outputs.

RoHS Compliant

For quantities of 100 and up, call for quote.

THAT Corporation ANALOG ENGINE® DYNAMICS PROCESSORS

These single-chip audio dynamics processors combine all the active circuitry needed to construct a wide range of dynamics processors. The 43xx series includes a high-performance, exponentially-controlled Blackmer® VCA and a log-responding rms-level sensor. The 4301 and 4320 include three general-purpose opamps allowing more complex signal processing.

Features:
- DAC SNR 97dB ('A' weighted), THD -85dB at 48kHz, 3.3V
- ADC SNR 88dB ('A' weighted), THD -80dB at 48kHz, 3.3V
- Complete Stereo / Mono Microphone Interface:
  - Programmable ALC / Noise Gate
- On-chip 400mW BTL Speaker Driver (mono)
- On-chip Headphone Driver:
  - >40mW output power on 16Ω / 3.3V
  - THD –73dB at 5mW, SNR 98dB with 16Ω load
  - No DC blocking capacitors required (capless mode)
- Separately mixed mono output
- Digital Graphic Equaliser
- Low Power:
  - 6 mW stereo playback (1.8V / 1.5V supplies)
  - 13 mW record & playback (1.8V / 1.5V supplies)
- Low Supply Voltages:
  - Analog 1.8V to 3.6V
  - Digital core: 1.42V to 3.6V
  - Digital I/O: 1.8V to 3.6V
- 256fs / 384fs or USB master clock rates: 12MHz, 24MHz
- 5x5x0.9mm QFN package

STEREO CODEC WITH 1W STEREO CLASS D SPEAKER AND HEADPHONE DRIVERS

The WM8960 is a low power, high quality stereo codec designed for portable digital audio and cell phone applications. Stereo class D speaker drivers provide 1W per channel into 8Ω loads with a 5V supply. Low leakage, excellent PSRR and pop/click suppression mechanisms also allow direct battery connection to the speaker supply.

- ADC SNR 94dB ('A' weighted), THD -82dB at 48kHz, 3.3V
- Pop and click suppression
- 3D Enhancement
- Stereo Class D Speaker Driver:
  - <0.1% THD with 1W per channel into 8Ω BTL speakers
  - 70dB PSRR @217Hz
  - 87% efficiency (1W output)
  - Flexible internal switching clock
- On-chip Headphone Driver:
  - 40mW output power into 16Ω at 3.3V
  - Capless mode support
  - THD -75dB at 20mW, SNR 90dB with 16Ω load
- Microphone Interface:
  - Pseudo differential for high noise immunity
  - Integrated low noise MICBIAS
  - Programmable ALC / Limiter & Noise Gate

Stereo CODEC Features:
- DAC SNR 98dB, THD -84dB ('A' weighted @ 48kHz)
- ADC SNR 90dB, THD -80dB ('A' weighted @ 48kHz)
- On-chip Headphone Driver with 'capless' option:
  - 40mW output power into 16Ω / 3.3V SPKVDD
- 0.9W output power into 8Ω BTL speaker / 5V SPKVDD:
  - Capable of driving piezo speakers
  - Stereo speaker drive configuration

Mic Preamps Features:
- Stereo Differential or mono microphone Interfaces:
  - Programmable preamp gain
  - Psuedo differential inputs with common mode rejection
  - Programmable ALC / Noise Gate in ADC path
- Low-noise bias supplied for electret microphones

For quantities of 1000 and up, call for quote.

Features:
- Highly Efficient Headphone Driver
- Audio Performance:
  - ADC SNR 90dB ('A' weighted) at 3.3V, 85dB at 1.8V
  - DAC SNR 100dB ('A' weighted) at 3.3V, 95dB at 1.8V
- Low Power:
  - Playback only 22mW, 8mW ('L' Variant)
  - Analogue Pass Through 12mW, 3.5mW ('L' variant)
  - 1.8 – 3.6V Analog Supply Operation ('L' Variant)
  - 2.7 – 3.6V Analog Supply Operation
  - 1.42 – 3.6V Digital Supply Operation
- Programmable Audio Data Interface Modes:
  - I2S, Left, Right Justified or DSP
  - 16/20/24/32 bit Word Lengths
  - Master or Slave Clocking Mode
- ADC and DAC Sampling Frequency: 8kHz – 96kHz
- Selectable ADC High Pass Filter
- 2 or 3-Wire MPU Serial Control Interface
- Microphone Input and Electret Bias with Side Tone Mixer
- Package: QFN-32 5x5mm

For quantities of 1000 and up, call for quote.

AC'97 AUDIO AND TOUCHPANEL CODEC

The WM9712L is a highly integrated input / output device designed for mobile computing and communications. The device can connect directly to a 4-wire or 5-wire touchpanel, mono or stereo microphones, stereo headphones and a mono speaker, reducing total component count in the system. Additionally, phone input and output pins are provided for seamless integration with wireless communication devices.

Features:
- AC'97 Rev 2.2 compatible stereo codec:
  - DAC SNR 94dB, THD –87dB
  - ADC SNR 92dB, THD –87dB
  - Variable Rate Audio, supports all WinCE sample rates
  - Tone Control, Bass Boost and 3D Enhancement
- Resistive touchpanel interface:
  - Supports 4-wire and 5-wire panels
  - 12-bit resolution, INL ±2 LSBs (<0.5 pixels)
  - X, Y and touch-pressure (Z) measurement
  - Pen-down detection supported in Sleep Mode
- On-chip 45mW headphone driver
- On-chip 400mW mono speaker driver
- Stereo, mono or differential microphone input - Automatic Level Control (ALC)
- Auxiliary mono DAC (ring tone or DC level generation)
- Seamless interface to wireless chipset
- Up to 5 GPIO pins
- 2 comparator inputs for battery monitoring
- Up to 4 auxiliary ADC inputs
- Package: QFN-48 7x7mm

Applications:
- Personal Digital Assistants (PDA)
- Smartphones
- Handheld and Tablet Computers

For quantities of 1000 and up, call for quote.

MONO CODEC WITH SPEAKER DRIVER

The WM8510 is a low power, high quality mono codec designed for Voice over Internet Protocol (VoIP) and Digital Telephones. The device integrates support for one pseudo-differential and one single ended input (Handset Mic and Speaker Mic) and includes drivers for speakers or headset, and mono line output, making it ideal for Telephone designs.

Features:

- DAC SNR 93dB, THD -84dB ('A'-weighted @ 8 – 48ks/s)
- ADC SNR 90dB, THD -80dB ('A'-weighted @ 8 – 48ks/s)
- On-chip Headphone/Speaker Driver with 'cap-less' connect:
  - 40mW output power into 16Ω / 3.3V SPKVDD
  - BTL speaker drive 0.8W into 8Ω / 5V SPKVDD
- Earpiece Line output
- Multiple analog inputs, plus analog bypass path (0 or -10dB)
- Low-noise bias supplied for microphone
- Digital Playback Limiter
- Programmable ADC High Pass Filter (wind noise reduction)
- Programmable ADC Notch Filter
- On-chip PLL
- 28 pin SSOP package
- Two Microphone Interfaces:
  - One pseudo-differential input
  - One single ended input
  - Programmable preamp gain
  - Psuedo differential inputs with common mode rejection
  - Programmable ALC / Noise Gate in ADC path
- Low power, low voltage:
  - 2.5V to 3.6V (digital core: 1.71V to 3.6V)
  - power consumption <10mW all-on 48ks/s mode

For quantities of 1000 and up, call for quote.

MULTIMEDIA AC'97 CODEC WITH INTEGRATED TOUCH SCREEN CONTROLLER

The WM9705 is a high-quality stereo audio codec with an integrated touch screen controller. The audio section is compliant with the Intel AC'97 Rev 2.2 specification. It performs full-duplex 18-bit codec functions and supports variable sample rates from 8 to 48k samples/s with high signal to noise ratio.

Features:

- AC'97 rev2.2 compliant codec with pen digitiser
- 18-bit stereo audio codecs
- On-chip sample rate conversion
- Multiple channel input mixer
- S/PDIF digital audio output
- Headphone drivers on AUX and MONO outputs
- 4-wire touch screen interface with co-ordinate and pressure measurement, and pen-down detection
- Wake-up from sleep mode on pen down
- 3V to 5V operation
- Extensive power management features including hardware power down option
- Standard AC'97 pinout in 48-pin TQFP package or 48-pin QFN package.

Applications:

- Personal Digital Assistants and 'Smartphones'
- PocketPC systems

For quantities of 1000 and up, call for quote.

ZETEX LED/LCD DRIVER SOLUTIONS/LIGHTING ICS

The ZXLD1100/1101/1937 are regulated voltage mode boost converters for white LED driving for backlighting in color LCD displays. An integrated switch and over voltage clamp (ZXLD 1100) reduces the solution component count. The ZXSC400 is a regulated, voltage mode converter for white LED backlighting in color LCD displays. The LED current (which is programmed with a single resistor) changes by typically less than 1% over the Li-Ion supply range. The ZXSC300/310 are constant power converters primarily focused at single or dual cell (white) LED driving in flashlight and garden light applications. Both products feature a programmable peak current to optimize efficiency and supply requirements. The ZXSC300/310 features a pulse mode that eliminates the need for a rectifier diode, which provides the highest efficiencies available especially for single cell operation.

Features:

- Internal 30V switch - ZXLD1100/1101
- Open circuit protection - ZXLD1100
- Low 0.1V feedback voltage for high efficiency - ZXLD series
- High efficiency: 94% - ZXSC3xx in pulse mode
- 0.8V operation - ZXSC3xx
- Programmable LED current
- Drives up to 8 LEDs at 20mA - ZXSC400
- Series, parallel and series parallel combinations
- < 500nA shutdown current

Applications:

- White LED backlighting for color LCD displays - ZXLD1100/1101
- Emergency/standby lighting - ZXSC400
- Solar powered traffic signs - ZXSC3xx
- High performance LED flashlights - ZXSC400
- LED flashlights - ZXSC3xx
- LED solar panel garden lights - ZXSC3xx

ZETEX VARIABLE SPEED BRUSHLESS FAN MOTOR CONTROLLER

The ZXMB1004 is a single phase BLDC motor pre-driver providing variable speed control. Suitable for DC fans and blowers the IC can take inputs from an external PWM source or a thermistor to adjust the speed characteristics.

Features:

- Single-phase pre-driver with variable speed control
- PWM output drive for speed control, variable by external thermistor or PWM inputs
- Adjustable minimum speed setting
- Ability to be able to remove any speed change against supply voltage variation
- Low noise

Applications:

- Telecom mainframe fans and blowers
- Mainframe and PC computer fans and blowers
- Industrial fans and blowers

ZETEX ANALOG VIDEO PRODUCTS

The Zetex range of video solutions has been expanded by the addition of a sync separator and a DC restore amplifier. The ZXFV4583 separates out the embedded sync information from PAL, NTSC, SECAM and other analog video signals. The ZXFV4089 uses a sync pulse (typically from a sync separator) to restore the video black level to the correct DC voltage. The high speed amplifiers/buffers include quad and single amplifiers plus multi-channel unity-gain buffers. The ZXFV202, single video amplifier, is available in SOT23 and SO8 offering superb differential gain and phase performance of 0.01%/0.01° respectively. ZXFV301N16 and ZXFV302N16 4:1 multiplexers are for use in video and other high speed applications. For greater versatility the ZXFV301/302 have different channel selection plus an output enable.

ZETEX SERIES - CLASS D AUDIO SOLUTIONS

The ZXCD1000 provides complete control and modulation functions at the heart of a high efficiency High performance Class D switching audio amplifier solution. In combination with Zetex HDMOS MOSFET devices, the ZXCD1000 provides a high performance audio amplifier with all the inherent benefits of Class D.

Features:

- >90% efficiency
- 4 / 8 Ω drive capability
- Noise Floor -115dB for solution
- Flat response 20Hz - 20kHz
- High gate drive capability (2200pF)
- Very low THD + N 0.2% typical full 90% power, full band (for the solution)
- Complete absence of crossover artifacts
- OSC output available for sync in multi-channel

Applications:

- DVD Players
- Automotive audio systems
- Home Theatre
- Multimedia
- Wireless speakers
- Portable audio
- Sub woofer systems
- Public Address system

ZETEX SINGLE AND MULTI-CELL SYSTEM POWER BOOST CONVERTERS

The ZXSC100/410/420 are voltage mode inductive boost converters aimed at providing system voltages from battery supplies. The ZXSC410/420 provide any regulated voltage above Vin from dual cell and Li-Ion cells with a typical line regulation of 1%. The ZXSC420 option provides an 'End of regulation' flag which uses all available battery energy before signaling a shutdown. The ZXSC100 caters for single cell operation with a guaranteed start up under full load conditions down to 1V. All products feature programmable peak current to optimize efficiency and supply requirements. Maximum output voltages are limited only by the rating of the external switching device.

Features:
- High efficiency: 80%+
- Typical 1% load and line regulation - ZXSC410/420
- Low shutdown current
- End of regulation flag - ZXSC420
- Single cell operation - ZXSC100
- Up to 2W output power

Applications:
- System supplies from dual cell and Li-Ion cells
- LCD bias voltage supplies
- System supplies from single Alkaline, NiCd or NiMH cells - ZXSC100
- System supplies from solar cells - ZXSC100
- Varactor and PIN diode bias

ZETEX ZXCT SERIES - CURRENT MONITORS

The ZXCT range of high-side current monitors and current sense amplifiers provide elegant design solutions for current measurement and power control. The ZXCT1009 current sensing monitor takes a high-side voltage developed across a current shunt resistor and, acting as a current mirror, translates it into a scaled ground referenced voltage. The ZXCT1010 offers reduced typical offset and improved accuracy at low sense voltages. The ZXCT1021/1022 current sense amplifiers are particularly suited to low sense voltage applications. The ZXCT1030 includes a 1.2V bandgap reference and comparator.

Features:
- High-side current sensing
- Output voltage scaling
- Up to 2.5V sense voltage
- 2.5-20V supply range
- 1% typical accuracy

Applications:
- Battery chargers
- Smart battery packs
- DC motor control
- Over current monitor
- Power management

ZETEX RESET LOW MONITORS

These devices are three terminal voltage monitoring circuits used in microprocessor systems. They provide a 'power on reset' function and produce a system reset 'low' on power fail. A selection of reset thresholds are available. All devices are designed to operate over the temperature range -40°C to 85°C.

Features:
- Automatic reset generation
- Guaranteed operation from 1V
- High output current

Applications:
- Microprocessor systems
- Computers and computer peripherals
- Automotive
- Battery powered equipment

RoHS Compliant

ZETEX BOOST CONVERTER FOR CAMERA PHOTOFLASH APPLICATIONS

The ZXSC440 is a dedicated photoflash charger, charging an 80μF photoflash capacitor to 300V in 3.5 seconds from a 3V supply. The flyback conversion efficiency is typically 75%, much higher than the commonly used discrete charging circuits. The Charge pin enables the circuit to be initiated from the camera's microprocessor, using negligible current when flash is not being used. The Ready pin signals the microprocessor when the flash is charged and ready to be fired. A small amount of hysteresis on the voltage feedback shuts down the device as long as the capacitor remains fully charged, again using negligible current.

Features:
- Charges a 80μF photoflash capacitor to 300V in 3.5 seconds from 3V
- Charges various value photoflash capacitors
- Over 75% flyback efficiency
- Charge and Ready pins
- Consumes only 4.5μA when not charging
- Small MSOP8 low profile package

Applications:
- Digital camera flash unit
- Film camera flash unit

RoHS Compliant

CEL SMD Monolithic Microwave ICs

CEL California Eastern Laboratories

RoHS Compliant **This page of product is compliant.**

CEL SMD SILICON MONOLITHIC CIRCUITS

CEL offers a broad range of silicon ICs for multimedia, mobile communications and wireless applications. They are based on a high performance bipolar process featuring fTS up to 45GHz. The process permits the productions of transistors with lower parasitics, improved passivation and emitter line widths as small as 0.6 microns. It accommodates low operating voltages while offering high operating frequencies, low noise figures, high efficiency and high reliability. These devices operate from 1 to 5 volts; they include amplifiers, prescalers, frequency converters, IQ modulators and demodulators and multifunction ICs for GPS (Global Positioning System), RKE (Remote Keyless Entry) and W-CDMA markets or for cable modems/settop boxes applications.

Electrical Characteristics (TA=25°C)

NEW FROM SUPPLIER

RoHS Compliant

CEL California Eastern Laboratories SILICON MONOLITHIC CIRCUITS

CEL offers a broad range of silicon ICs for multimedia, mobile communications and wireless applications. They are based on a high performance bipolar process featuring fTS up to 45GHz. The process permits the productions of transistors with lower parasitics, improved passivation and emitter line widths as small as 0.6 microns. It accommodates low operating voltages while offering high operating frequencies, low noise figures, high efficiency and high reliability These devices operate from 1 to 5 volts; they include amplifiers, prescalers, frequency converters, IQ modulators and demodulators and multifunction ICs for GPS (Global Positioning System), RKE (Remote Keyless Entry) and W-CDMA markets or for cable modems/settop boxes applications.

These devices (the NEC UPG2314T5N medium power amplifier and two UPG2214TK RF switches) can be used for a "range extension" application at 2.4GHz (such as for Bluetooth or ZigBee applications). With a 3V power supply and 0dBm of input power, this range extender will deliver 19dBm of output power (including the insertion loss of the switches and PCB), for a current draw of approximately 65mA. The "thru" path has approx. 1.4dB of loss (insertion loss of both switches + loss in the PCB). Please see the NEC/CEL RF IC Evaluation Boards page for evaluation boards (UPG2301TQ-ZBT-EV-A, UPG2314T5N-ZBT-EV-A and UPG2250T5N-EVAL-A) that are available for use in this type of application.

CEL RF IC Evaluation Boards

Products may be RoHS compliant.
Check mouser.com for RoHS status.

Evaluation boards help speed the design process by providing our customers with good examples of working circuit designs. Prototypes are designed, etched and tested in the engineering facility at California Eastern Laboratories.

Features:

- Layout is done in AutoCad®
- Boards are produced on FR4 board material to simulate the production environment
- RF and IF inputs and outputs are ported through SMA connectors
- DC connections are through header pins
- On-board bypass capacitors are provided
- Includes assembly drawings, schematics, datasheet and typical test data

Evaluation boards for RFICs are either 50 ohms in and out for wideband use or have been optimized for use at industry standard frequencies (900 MHz, 1900 MHz, 1.9 GHz, etc.)

NEW FROM SUPPLIER

SiGe Low Noise Amplifier

UPC8211TK-EV04	For evaluation of UPC8211TK-A, optimized at 400MHz	108.00
UPC8211TK-EV09	For evaluation of UPC8211TK-A, optimized at 900MHz	108.00
UPC8211TK-EV15	For evaluation of UPC8211TK-A, optimized at 1.5GHz	108.00
UPC8211TK-EV24	For evaluation of UPC8211TK-A, optimized at 2.4GHz	108.00
UPC8215TU-EV1575	For evaluation of UPC8215TU-A, optimized at 1.5GHz	108.00
UPC8230TU-EVAL-A	For evaluation of UPC8230TU-A	108.00
UPC8231TK-EVAL-A	For evaluation of UPC8231TK-A	108.00
UPC8232T5N-EVAL-A	For evaluation of UPC8232T5N-A	108.00

Frequency Downconverters

MOUSER STOCK NO.	Description	Price Each
UPC2756TB-EVAL	For evaluation of UPC2756TB-A	108.00
UPC2757TB-EVAL	For evaluation of UPC2757TB-A	108.00
UPC2758TB-EVAL	For evaluation of UPC2758TB-A	108.00
UPC2798GR-EVAL	For evaluation of UPC2798GR-A	108.00
UPC3220GR-APBD	For evaluation of UPC3220GR-A	108.00
UPC8112TB-EVAL	For evaluation of UPC8112TB-A	108.00

Frequency Upconverters

UPC8106TB-EV09	For evaluation of UPC8106TB-A, optimized for 900MHz	108.00
UPC8106TB-EV19	For evaluation of UPC8106TB-A, optimized for 1.9GHz	108.00
UPC8106TB-EV24	For evaluation of UPC8106TB-A, optimized for 2.4GHz	108.00
UPC8163TB-EV09	For evaluation of UPC8163TB-A, optimized for 900MHz	108.00
UPC8163TB-EV19	For evaluation of UPC8163TB-A, optimized for 1.9GHz	108.00
UPC8187TB-EV08	For evaluation of UPC8187TB-A, optimized for 800MHz	108.00
UPC8187TB-EV19	For evaluation of UPC8187TB-A, optimized for 1.9GHz	108.00
UPC8187TB-EV24	For evaluation of UPC8187TB-A, optimized for 2.4GHz	108.00

Prescalers

MOUSER STOCK NO.	Description	Price Each
UPB1508GV-EVAL	For evaluation of UPB1508GV-A	108.00
UPB1509GV-EVAL	For evaluation of UPB1509GV-A	108.00
UPB1510GV-EVAL	For evaluation of UPB1510GV-A	108.00

AGC Amplifiers

MOUSER STOCK NO.	Description	Price Each
UPC3217GV-EVAL	For evaluation of UPC3217GV-A	108.00
UPC3218GV-EVAL	For evaluation of UPC3218GV-A	108.00
UPC3219GV-EVAL	For evaluation of UPC3219GV-A	108.00
UPC3221GV-EVAL	For evaluation of UPC3221GV-A	108.00
UPC8204TK-EV19	For evaluation of UPC8204TK-A, optimized at 1.9GHz	108.00
UPC8204TK-EV24	For evaluation of UPC8204TK-A, optimized at 2.4GHz	108.00

Driver Amplifiers

UPD5702TU-EV09	For evaluation of UPD5702TU-A, optimized at 900MHz	120.00
UPD5702TU-EV24	For evaluation of UPD5702TU-A, optimized at 2.4GHz	120.00

SPDT Dual Control Switches

MOUSER STOCK NO.	Description	Price Each
UPG2009TB-EVAL	For evaluation of UPG2009TB-A	108.00
UPG2155TB-EVAL	For evaluation of UPG2155TB-A	109.00
UPG2030TK-EVAL	For evaluation of UPG2030TK-A	108.00
UPG2179TB-EVAL	For evaluation of UPG2179TB-A	108.00

SPDT Single Control Switches

MOUSER STOCK NO.	Description	Price Each
UPG2010TB-EVAL	For evaluation of UPG2010TB-A	108.00
UPG2012TB-EVAL	For evaluation of UPG2012TB-A	109.00
UPD5713TK-EVAL	For evaluation of UPD5713TK-A	108.00
UPD5713TK-EVNC-A	For evaluation of UPD5713TK-A	109.00
UPG2012TK-EVAL	For evaluation of UPG2012TK-A	109.00
UPG2015TB-EVAL	For evaluation of UPG2015TB-A	109.00

Multi-Throw Switch

UPG2031TQ-EVAL	For evaluation of UPG2031TQ-A	108.00

Dualband DPDT Switch

MOUSER STOCK NO.	Description	Price Each
UPG2035T5F-EVAL	For evaluation of UPG2035T5F-A	120.00

NEW FROM SUPPLIER

Broadband Switches

UPG2157T5F-EVAL-A	For evaluation of UPG2157T5F-A	108.00
UPG2163T5N-EVAL	For evaluation of UPG2163T5NF-A	109.00

Power Amplifier for UHF to S-Band

UPG2118K-EV09	For evaluation of UPG2118K-A, optimized at 900MHz	135.00

GaAs Power Amplifier

MOUSER STOCK NO.	Description	Price Each
UPG2301TQ-EVPW24	For evaluation of UPG2301TQ-A, optimized at 2.4GHz	135.00

NEW FROM SUPPLIER

ZigBee Range Extenders

UPG2250T5N-EVAL-A	For evaluation of UPG2250T5N-A	109.00
UPG2301TQ-ZBT-EV-A	For evaluation of UPG2301TQ-A	109.00
UPG2314T5N-ZBT-EV-A	For evaluation of UPG2314T5N-A	109.00

FAIRCHILD Operational Amplifiers

Products may be RoHS compliant.
Check mouser.com for RoHS status.

ANALOGIC TECH Power Management ICs

ANALOGIC TECH

RoHS Compliant **This page of product is compliant.**

AnalogicTech solves the challenges of extending battery life, improving reliability, and reducing the size and weight of new designs with total power management solutions based on innovative analog and mixed-signal integrated circuits. Playing a critical role in system design, these devices manage battery life, voltage regulation, power-saving load switching, and electronic protection of computer input/output. The company's engineering team possesses a unique combination of expertise in analog IC and device design, process technology, packaging, and power management applications.

RoHS Compliant

DC/DC CONVERTERS

AnalogicTech's DC/DC converter products are designed to provide high efficiency voltage regulation in a very small size to extend battery life in portable electronic systems. The SwitchReg™ parts are members of AnalogicTech's Total Power Management IC™ (TPMIC™) product family.

Features:
- Soft-start control
- Over-temperature protection
- -40°C to +85°C Temperature range

For quantities of 2500 and up, call for quote.

LDO LINEAR REGULATORS

AnalogicTech's LDO linear regulator products are designed to provide a well regulated power supply while maximizing the performance for a given application with minimum board space.

Features:
- Cellular phones
- Digital cameras
- Notebook computer
- Portable communication devices
- Low dropout
- Guaranteed 150mA output
- High accuracy

For quantities of 2500 and up, call for quote.

BATTERY MANAGERS

"The AnalogicTech BatteryManagers™ are part of their Total Power Management IC™ (TPMIC™) product family. This product is a highly integrated single cell lithium-ion/polymer battery charger IC that requires a minimum number of external components. BatteryManagers precisely regulate battery charge voltage and current for 4.2V lithium-ion/polymer battery cells.

Features:
- Cellular phones
- Digital cameras
- Notebook computer
- Portable communication devices

For quantities of 2500 and up, call for quote.

INTEGRATED LOAD SWITCHES

The AAT4250 SmartSwitch is a member of AnalogicTech's Application Specific Power MOSFET (ASPM) product family. It is a Slew Rate Controlled P-channel MOSFET power switch designed for high-side load-switching applications. AnalogicTech's integrated load switching products offer new levels of small size and high integration for power management load switching in portable electronic systems.

Features:
- 1.8V to 5.5V Input voltage range
- Low quiescent current
- Only 2.0V needed for ON/OFF control
- Temperature range -40°C to +85°C
- 5kV ESD rating

For quantities of 2500 and up, call for quote.

MOUSER STOCK NO.	AATI Part No.	Package Type	Channel	V_{IN} (V) (max)	I_{GND} (A) (Typ)	$R_{DS(ON)}$ (m) (Typ)	Turn On Rise Time (Tr)	Enable	Price Each

CURRENT LIMITING HIGH SIDE SWITCH

The AAT4610A SmartSwitch is a member of AnalogicTech's Application Specific Power MOSFET (ASPM) product family. It is a Current Limited P-channel MOSFET power switch designed for high-side load-switching applications.

Features:
- 2.4V to 5.5V Input voltage range
- Programmable over current threshold
- Fast transient response
- Low quiescent current
- Only 2.5V needed for ON/OFF control
- Under-voltage lockout
- Temperature range: -40°C to +85°C
- 4kV ESD rating

MOUSER STOCK NO.	AATI Part No.	Package Type	Channel	V_{IN} (V) (max)	I_{GND} (A) (Typ)	$R_{DS(ON)}$ (m) (Typ)	I_{LM}	Enable	Price Each

CHARGE PUMP

The AAT3125 USB On-the-Go (OTG) charge pump is a member of AnalogicTech's Total Power Management IC product family. The device integrates a high efficiency 1.5x fractional 100mA regulated charge pump for supplying VBUS with the additional functions required for OTG-devices. Four voltage detectors monitor VBUS and a current source, dedicated for VBUS pulsing, are provided for compliance with Session Request Protocol (SRP) as defined by the USB OTG Supplement.

- Under-voltage lockout, output short circuit, & thermal protection.
- Temperature range: -40°C to +85°C
- High efficiency fractional topology
- High frequency 750kHz switching speed

MOUSER STOCK NO.	AATI Part No.	Package Type	Channel	V_{IN} (V) (max)	I_{GND} (A) (Typ)	$R_{DS(ON)}$ (m) (Typ)	I_{LM}	Enable	Price Each

BUFFERED POWER HALF-BRIDGE

The AAT4900 FastSwitch is a member of AnalogicTech's Application Specific Power MOSFET (ASPM) product family. It is a Buffered Power Half-Bridge, consisting of low on-resistance Power MOSFETs with integrated control logic. AnalogicTech's power half bridge products offer the highest level of integration and speed for multiple high performance applications.

Features:
- 2.7V to 5.5V Input voltage range
- Low quiescent current
- Only 2.5V needed for control signal input
- Break before make shoot-through protection
- Temperature range: -40°c to +85°C

Applications:
- DC motor drive
- High frequency DC to DC converters
- MOSFET driver

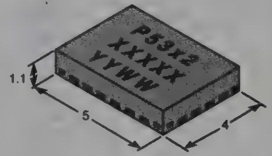
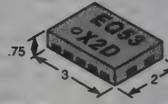
D



E



DIMENSIONS: mm

Enpirion is a provider of highly integrated power management solutions, and leverages advances in Power Semiconductor Devices and CMOS-compatible Magnetics to deliver the world's first complete DC-DC conversion in an IC package. Enpirion solutions reduce footprint by up to 70%, reduce parts count by as much as 60%, and dramatically ease the design constraints associated with switch-mode DC-DC converters.

Enpirion makes the industry's smallest Power System on Silicon (PSoS) - the first ultra-integrated all-silicon DC-to-DC converter, and the first to feature an integrated inductor. Enpirion's patented approach capitalizes on semiconductor geometry advances that enable a 10x switching-frequency improvement - integrating a PWM controller, power FETs, compensation circuitry, and magnetic components into a single turnkey IC package.

Enpirion manufactures a growing line of Switch-mode DC-DC converters with integrated inductor. Integration of the inductor sets Enpirion products apart from the competition. The layout and placement of the inductor is one of the most common reasons for power IC related failures. Enpirion solves this problem, reduces foot print, reduces part count, and reduces noise associated with switch-mode power conversion. Applications include high volume consumer products such as mobile phones, portable game players, MP3 and personal media players, as well as data networking, telecoms, user terminal equipment such as set top box, and of course notebook and desktop PC.

ENPIRION DC-DC CONVERTER / SWITCHER - POL PRODUCTS

FAIRCHILD Power Switch and PFC ICs

Products may be RoHS compliant.
Check mouser.com for RoHS status.

OFFLINE IC'S - FAIRCHILD POWER SWITCH

The Fairchild Power Switch(FPS) product family is specially designed for an off line SMPS with minimal external components. The Fairchild Power Switch(FPS) consist of a high voltage power SenseFET and a current mode PWM IC. Included PWM controller features integrated fixed oscillator, the under voltage lock out, the leading edge blanking, the optimized gate turn-on/turn-off driver, the thermal shutdown protection, the over voltage protection, and the temperature compensated precision current sources for the loop compensation and a fault protection circuitry. compared with a discrete MOSFET and a controller or a RCC switching converter solution, a Fairchild Power Switch(FPS) can reduce total component count, design size, and weight and at the same time increase efficiency, productivity, and system reliability. It has a basic platform well suited for the cost effective LCD monitor power supply.

Fairchild Power Switch Designer Software (10.5M)
This software currently only works with Windows 95 and Windows 98.
Contains:
- FPS Designer Software Installation Notes - Instructions and Requirements (.txt file)
- FPS Designer Software Installer (.exe file)
- FPS Designer User Guide (.doc file)
- FPS Designer User Guide (.pdf file)

NJR Low Dropout Voltage Regulators

Products may be RoHS compliant.
Check mouser.com for RoHS status.

LOW DROPOUT VOLTAGE REGULATORS

Features:
- High Precision Single Output
- Internal Short Circuit Current Limiting
- Internal Thermal Overload Protection
- Low Noise
- Low Quiescent Current
- ON/OFF Control
- Suitable for low power, space conscious applications

Applications:
- Battery Backup Systems
- Cellular Phones
- GPS
- Remote Controls
- Set Top Boxes

For quantities of 500 and up, call for quote.

NEC ELECTRONICS AMERICA Power Management

RoHS Compliant **This page of product is compliant.**

LOW DROPOUT VOLTAGE REGULATORS

- Ranging upward from a low output voltage of 1.5V
- Low current consumption with CMOS process, reduced from 1.5mA
- On/off function on UPC30 series
- High precision output voltage (+/- 1%)

For quantities of 500 and up, call for quote.

LOW VOLTAGE POWER MOSFETS

- Super low ON-resistance
- Applications ranging from automotive electronics to PC power supplies
- A wide variety of package types for various mounting requirements
- High reliability

For quantities of 500 and up, call for quote.

NEC Electronics America

RoHS Compliant **This page of product is compliant.**

LOW VOLTAGE POWER MOSFETS (CONT.)

- Super low ON-resistance
- Applications ranging from automotive electronics to PC power supplies
- A wide variety of package types for various mounting requirements
- High reliability

For quantities of 500 and up, call for quote.

ESD PROTECTION DIODES

- Ensured compliance with international ESD standard (IEC61000-4-2 Level 4)
- Low capacitance, suitable for high-speed signal lines

For quantities of 500 and up, call for quote.

MOUSER STOCK NO.	NEC Part No.	Package	Configuration	Ct (pF)	IR (uA)	ESD (min.) kV	Price Each

Products may be RoHS compliant.
Check mouser.com for RoHS status.

VERY LOW POWER AC-DC, NON-ISOLATED LINEAR/PASSIVE SUPPLY REPLACEMENT (≤ 360 MA)

NEW FROM SUPPLIER

Features:

- Self Powered
- Remote ON/OFF
- Auto Restart
- Power Limiting
- EcoSmart® Low Standby/No-Load Power Consumption
- Thermal Shutdown - Hysteresis

DPA-SWITCH® FAMILY DC-DC CONVERTERS FOR POWER OVER ETHERNET (POE) & TELECOM

DPA-Switch® cost effectively combines a high frequency power MOSFET, PWM control, fault protection, and other control circuitry on a single CMOS chip. Features include short circuit and open loop protection, programmable current limit, under-voltage and overvoltage detection, hysteretic thermal shutdown, soft-start, feedback compensation, and remote ON/OFF. DPA-Switch ICs can save over 20 external components when compared to conventional discrete designs, providing significant savings in both board space and cost.

Features:

- Soft Start
- Fully Integrated Current Sensing
- Adjustable Current Limit
- Auto Restart
- Power Limiting
- Line UV Detection
- Line OV Detection
- Remote ON/OFF
- Thermal Shutdown - Hysteresis
- EcoSmart® Low Standby/No-Load Power Consumption
- Synchronizable to Lower External Clock Frequency
- Simultaneous Line Sensing and Current Limit

SII HIGH PRECISION VOLTAGE DETECTORS

S-1000 Series

The S-1000 series is a series of high-precision voltage detectors developed using CMOS process. The detection voltage is fixed internally with an accuracy of ±1.0%. It operates with low current consumption of 350 nA typ.

- Ultra-low current consumption 350 nA typ. (VDD = detection voltage + 1.5 V)
- High-precision detection voltage ±1.0%
- Operating voltage range 0.95 to 5.5 V
- Hysteresis characteristics 5% typ.

RoHS Compliant

For quantities 2000 and up, call for quote.

MOUSER STOCK NO.	Seiko Part No.	Package Type	Output Form	Detection Voltage (V)	Hysteresis Width (V) (Typ.)	Current Consumption (μA) (Typ.)	Price Each

S-801 Series

The S-801 series is a series of high-precision voltage detectors with a built-in delay time generator of fixed time developed using CMOS process. The detection voltage is fixed internally, with an accuracy of ±2.0%. Internal oscillator and counter timer can delay the release signal without external parts.

- Ultra-low current consumption: 1.3 μA Typ. (at VDD = 3.5V)
- High-precision detection voltage: ±2.0%
- Delay times: 100 ms Typ.
- ON/OFF switch of delay time (DS pin)
- Operating voltage range: 0.95V to 10.0V
- Detection voltage: 2.2V to 6.0V (0.1V step)

RoHS Compliant

For quantities 2000 and up, call for quote.

S-808 Series

The S-808xxC series is a series of high-precision voltage detectors developed using CMOS process. The detection voltage is fixed internally with an accuracy of ±2.0%. Ultra-low current consumption and miniature package lineup can meet demand from the portable device applications.

- Ultra-low current consumption: 1.3 μA Typ. (at VDD = 1.5 V) (Products with detection voltage of 1.4 V Typ. or less)
  0.8 μA Typ. (at VDD = 3.5 V) (Products with detection voltage of 1.5 V Typ. or less)
- High-accuracy detection voltage: ±2.0%
- Operating voltage range: 0.65 V to 5.0 V (Products with detection voltage of 1.4 V Typ. or less)
  0.95 V to 10.0 V (Products with detection voltage of 1.5 V Typ. or less)
- Hysteresis characteristics: 5 % Typ.

RoHS Compliant

SII HIGH PRECISION VOLTAGE DETECTORS (CONT.)

S-809 Series

The S-809xxC series is a high-precision voltage detector developed using a CMOS process. The detection voltage is fixed internally, with an accuracy of ±2.0%. A time delayed reset can be accomplished with the addition of an external capacitor.

- Ultra-low current consumption: 1.0 μA Typ. (at VDD = 2.0 V); Detection voltage: less-than or equal to 1.4 V
  1.1 μA Typ. (at VDD = 3.5 V); Detection voltage: greater-than or equal to 1.5 V
- High-precision detection voltage: ±2.0%
- Operating voltage range: 0.7 V to 10.0 V
- Detection voltage: 1.3 V to 6.0 V (0.1 V step)
- Hysteresis characteristics: 5% Typ.

RoHS Compliant

For quantities 2000 and up, call for quote.

SII BATTERY PROTECTION ICS

RoHS Compliant

S-8241 Series for 1-Cell Batteries

The S-8241 Series is a protection IC for lithium-ion/lithium polymer rechargeable batteries and includes a high precision detection circuit and a delay circuit. It is the optimal IC for protection against overcharge, overdischarge and overcurrent in 1-cell lithium-ion/lithium polymer rechargeable battery packs.

For quantities 2000 and up, call for quote.

S-8242 Series for 2-Serial Cell Batteries

The S-8242 Series is a protection IC for 2-serial cell lithium-ion/lithium polymer rechargeable batteries and includes a high precision detection circuit and a delay circuit. These ICs are suitable for protecting 2-cell rechargeable lithium-ion/lithium polymer battery packs from overcharge, overdischarge and overcurrent.

RoHS Compliant

For quantities 2000 and up, call for quote.

SII HIGH PRECISION VOLTAGE REGULATORS

S-812 Series

The S-812 Series is a three-terminal positive voltage regulator made using the CMOS process. Since this has higher precision output voltage and consumes less current than existing three-terminal voltage regulators, battery-powered portable equipment can have a higher performance and a longer service life.

RoHS Compliant

For quantities 2000 and up, call for quote.

SII HIGH PRECISION VOLTAGE REGULATORS (CONT.)

S-814 Series

The S-814 Series is a low dropout voltage, high output voltage accuracy and low current consumption positive voltage regulator developed utilizing CMOS technology. Built-in low ON-resistance transistors provide low dropout voltage and large output current. A power-off circuit ensures long battery life. Various types of output capacitors can be used in the S-814 Series compared with the past CMOS voltage regulators. (i.e., small ceramic capacitors can also be used in the S-814 Series). These are recommended to be used for configuring portable devices and large output current applications, respectively.

RoHS Compliant

For quantities of 2000 and up, call for quote.

S-818 Series

The S-818 Series is a positive voltage regulator developed utilizing CMOS technology featured by low dropout voltage accuracy and low current consumption. Built in low ON-resistance transistor provides low dropout voltage and large output current. A ceramic capacitor of 2uF or more can be used as an output capacitor. A power-OFF circuit ensures long battery life. The packages available are recommended for configuring portable devices and large output current applications.

RoHS Compliant

For quantities of 2000 and up, call for quote.

SII LOW DROP OUT VOLTAGE REGULATORS

S-1111 Series

The S-1111 Series is a positive voltage regulator with a low dropout voltage, high output voltage accuracy, and low current consumption developed based on CMOS technology. A built-in low on-resistance transistor provides a low dropout voltage and large output current, and a built-in overcurrent protector prevents the load current from exceeding the current capacitance of the output transistor. An ON/OFF circuit ensures a long battery life, and small SOT-23-5 package realizes high-density mounting.

RoHS Compliant

For quantities of 2000 and up, call for quote.

SEIKO INSTRUMENTS PWM CONTROLLED STEP-UP SWITCHING REGULATORS

S-8330 Series

The S-8330 Series is a CMOS PWM control step-up switching regulator which mainly consists of a reference voltage source, an oscillation circuit, a power MOSFET and an error amplifier. The new output voltage can adjust by a built-in electronic volume circuit and is equipped with a shutdown function. It is a low current consumption device because of the CMOS structure. A step-up switching regulator can be constructed by externally connecting only a coil, a capacitor and a diode.

For quantities of 1000 and up, call for quote.

SEIKO INSTRUMENTS PWM/PFM CONTROLLED STEP-UP SWITCHING REGULATOR/CONTROLLERS

S-8341 Series

The S-8341 Series consists of CMOS step-up switching regulator/controllers with PWM/PFM switched control. These devices contain a reference voltage source, oscillation circuit, error amplifier, phase compensation circuit, PWM control circuit, and other components. Since the oscillation frequency is a high 600 kHz, with the addition of a small external component, the ICs can function as step-up switching regulators with high efficiency and large output current. The speed of the output stage is enhanced so that the Nch power MOS with a low ON resistance can be switched quickly. This device contains a PWM/PFM switching control circuit so that it operates using PWM control with a duty ratio of 27% or higher and using PFM control with a duty ratio of lower than 27% to ensure high efficiency in all load ranges. These ICs serve as ideal main power supply units for portable devices when coupled with the 8-pin TSSOP package and high oscillation frequencies.

For quantities of 1000 and up, call for quote.

SII CONTROLLED STEP-UP SWITCHING REGULATORS

S-8351 Series, PFM

The S-8351 Series is a CMOS PFM-controlled step-up switching regulator that mainly consists of a reference voltage source, an oscillator, and a comparator. The PFM controller allows the duty ratio to be automatically switched according to the load (light load: 50%, high output current: 75%), enabling products with a low ripple over a wide range, high efficiency, and high output current. With the S-8351 Series, a step-up switching regulator can be configured by using an external coil, capacitor, and diode. The built-in MOSFET is turned off by a protection circuit when the voltage at the CONT pin exceeds the limit to prevent it from being damaged. This feature, along with the mini package and low current consumption, makes the S-8351 Series ideal for applications such as the power supply unit of portable equipment.

RoHS Compliant

For quantities of 1000 and up, call for quote.

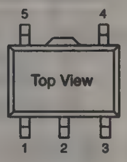
SOT-89-5



S-8353 Series, PWM

The S-8353 Series is a CMOS step-up switching regulator which mainly consists of a reference voltage source, an oscillation circuit, a power MOSFET, an error amplifier, a phase compensation circuit and a PWM controller. The step-up switching regulator can be configured simply by attaching a coil, capacitor, and diode externally. In addition to the above features, the small package and low power consumption of this series make it ideal for portable device applications requiring high efficiency. The S-8353 Series realizes low ripple, high efficiency, and excellent transient characteristics due to its PWM controller, which can vary the duty ratio linearly from 0% to 83% , optimally-designed error amplifier, and phase compensation circuits.

RoHS Compliant

For quantities of 1000 and up, call for quote.

S-8354 Series, PWM/PFM

The S-8354 Series is a CMOS step-up switching regulator which mainly consists of a reference voltage source, an oscillation circuit, a power MOSFET, an error amplifier, a phase compensation circuit, and a PWM/PFM switching controller. The step-up switching regulator can be configured simply by attaching a coil, capacitor, and diode externally. In addition to the above features, the small package and low power consumption of this series make it ideal for portable device applications requiring high efficiency. The PWM/PFM switching controller that can switch the operation to a PFM controller with a duty ratio is 15% under a light load to prevent a decline in the efficiency due to the IC operating current.

RoHS Compliant

For quantities of 1000 and up, call for quote.

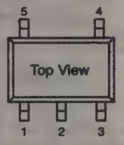
SOT-23-5



SII S-8460 SERIES, PWM CONTROLLED STEP-UP/STEP-DOWN SWITCHING REGULATOR/CONTROLLER

The S-8460 is a PWM controlled step-up and step-down switching regulator-controller consisting of an automatic-selection control circuit for step-up and step-down, a reference voltage source, an oscillation circuit, an error amplifier, a phase compensation CMOS circuit, etc. The automatic selection control circuit for step-up and step-down in PWM control realizes a high performance step-up and step-down switching regulator operating on one coil. Adopting N-channel power MOS transistors for external switches, in addition, enables high efficiency and high output current. It provides low-ripple output, high-efficiency and excellent transient characteristics which come from the PWM control circuit capable of varying the duty ratio linearly from 0%, the optimized error amplifier and the phase compensation circuit.

RoHS Compliant

For quantities of 1000 and up, call for quote.

SII S-8521 SERIES, PWM/PFM CONTROLLED STEP-DOWN SWITCHING REGULATOR/CONTROLLERS

The S-8521 Series consists of a CMOS step-down switching regulator/controllers with PWM/PFM-switched control. These devices contain a reference voltage source, oscillation circuit, error amplifier and other components. It works in either PWM control or PFM control and can switch from one to the other. It normally operates using PWM control with a duty ratio of 25% to 100%, but under a light load, it automatically switches to PFM control with a duty ratio of 25%. This ensures high efficiency over a wide range of conditions, from standby mode to operation of peripheral equipment. With the addition of an external P-Channel MOSFET or PNP transistor, a coil, capacitors and a diode connected externally, these can function as step-down switching regulators.

RoHS Compliant

For quantities of 1000 and up, call for quote.

SII ● S-8813 SERIES CHARGE PUMP DC-DC CONVERTER, SURFACE MOUNT

The S-8813 Series is a PFM controlled charge pump DC-DC converter with a built-in constant-current circuit, and was developed using CMOS technology. Its constant current output makes this series ideal as a power supply for current drive LEDs. The S-8813 Series features three output channels and can drive three LEDs. Since small ceramic capacitors can be used as external capacitors (pump capacitors, input capacitors, output capacitors), the S-8813 Series contributes to set miniaturization.

RoHS Compliant

- PFM control CMOS charge pump
- Built-in constant current circuit

For quantities of 1000 and up, call for quote.

SII ● S-89431 SERIES RAIL-TO-RAIL CMOS OPERATIONAL AMPLIFIERS, SURFACE MOUNT

The S-8943xA/B series are CMOS type operational amplifiers that feature Rail-to-Rail I/O and an internal phase compensation circuit. These features enable driving at a lower voltage (from 0.9V) and with lower current consumption (0.5 μA typ.) than existing general-purpose operational amplifiers, making the S-8943xA/B series ideal for use in battery-powered compact portable devices. The S-8943xA series is a single operational amplifier, with one circuit incorporated in the ultra-small SC-88A. The S-8943xB Series is a dual operational amplifier, with two circuits incorporated in the slim and small 8-pin MSOP package.

RoHS Compliant

For quantities of 1000 and up, call for quote.

SII ● S-89110 SERIES LOW CURRENT CONSUMPTION CMOS OPERATIONAL AMPLIFIERS, SURFACE MOUNT

The mini-analog series mounts a general purpose analog circuit within a small package. The S-89110A is a CMOS type single operational amplifier having a phase compensation circuit, that can be driven by lower voltage with lower consumption current than former bipolar operational amplifiers. This makes it the optimum solution for small battery powered portable equipment.

RoHS Compliant

For quantities of 1000 and up, call for quote.

SII ● VOLTAGE COMPARATORS, SURFACE MOUNT

S-89531 Series

The mini analog series is a group of ICs that incorporates a general purpose analog circuit in an ultra-small packages. The S-89530A/89531A Series are CMOS type comparators that feature rail-to-rail input/out and can be driven at a lower voltage and with lower current consumption than existing comparators, making them ideal for use in battery-powered compact portable devices.

Features:

- Lower operating voltage than the conventional general purpose comparators: VDD = 1.8 to 5.5V
- Low current consumption: IDD = 50 uA
- Low input offset voltage: 4.0 mV (max)

Applications:

- Cellular phones
- Digital cameras
- PDAs
- Digital Video Cameras
- Notebook PCs

RoHS Compliant

STMICROELECTRONICS POWER FACTOR CORRECTOR EVALUATION BOARDS

These demonstration boards have been realized to provide the user with a simple evaluation tool for the operation of the PFC controller L4981A or L6562. The application is a typical boost PFC pre-regulator with a power rating suitable for most office equipment. To help the user in the design stage, the demonstration board is delivered with WINDOWS compatible software covering all ST's PFC controllers.

Features:
- PFC pre-regulator in boost topology
- Wide-range mains supply (88 to 264 Vac)
- 400 V, 200 W output
- 100 kHz switching freq.
- Over voltage and over current protection
- 0.999 Power Factor
- Less than 3.5% Total Harmonic Distortion
- Over 95% efficiency

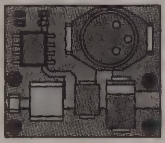
STMICROELECTRONICS EVALUATION BOARDS

These demonstration boards are complete tools to evaluate the L5970D, L5972D, L5973AD, L5973D and L6902D switching regulators. The system is a buck topology converter with a sense resistor to set the constant output current from 50mA up to 1.5A (in according to package power dissipation). The demo board supports maximum input/output voltages of 16V/10V, above this voltage rating of the input /output capacitors must be changed.

EVAL5970D Shown



For quantities of 10 and up, call for quote.

BUS INTERFACE-DRIVER AND RECEIVER

RoHS Compliant

The Si9200EY is designed to interface between the Intel 82526 CAN controller and the physical bus to provide drive capability to the bus and differential receive capability to the controller. It is designed to absorb typical electrical transients on the bus which may occur in an automotive or industrial application, and protect itself against any abnormal bus conditions. The transmitter will be disabled during these conditions and will be re-enabled when the abnormal condition is cleared. The Si9200EY is built using the Siliconix BiC/DMOS process. This process supports CMOS, DMOS, and isolated bipolar transistors and uses an epitaxial layer to prevent latchup. The bus line pins are diode protected and can be driven beyond the VDD to ground range. The Si9200EY is offered in the space efficient 8-pin high-density surface-mount plastic package and is specified over the automotive temperature range (–40 to 125°C).

For quantities of 2000 and up, call for quote.

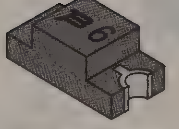
BOURNS SMD Diodes

SMD SWITCHING DIODES

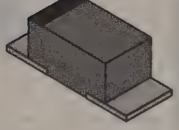
Bourns offers small-signal high-speed Switching Diodes for switching digital signal applications, in compact chip package size format, which offer PCB real estate savings and are considerably smaller than competitive parts. The diodes are lead-free with Cu/Ni/Au plated terminations and are compatible with lead-free manufacturing processes, conforming to many industry and government regulations on lead-free components. Bourns® Chip Diodes conform to JEDEC standards, easy to handle on standard pick and place equipment and their flat configuration makes roll away much more difficult.

RoHS Compliant

LEAD-FREE



CD0805 Series Illustrated



CD1607 Series Illustrated

Features:
- Leadless
- Lead-free
- High speed
- Low Profile Package
- Very Low Forward Voltage Drop

Applications:
- Cellular phones
- PDAs
- Desktop PCs and notebooks
- Digital cameras
- MP3 players

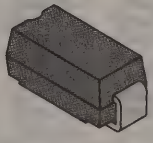
SMD SCHOTTKY RECTIFIER DIODES

Bourns offers Schottky Rectifier Diodes for rectification applications, in compact chip package DO-214AC (SMA) size format, which offer PCB real estate savings and are considerably smaller than competitive parts. The Schottky Rectifier Diodes offer a forward current of 1 A to 3 A with a choice of repetitive peak reverse voltage of 20 V up to 100 V.



Features:
- SMA package
- Surface mount
- Very low forward voltage drop

LEAD-FREE

For quantities of 4000 and up, call for quote.

SBR® SUPER BARRIER RECTIFIERS

A ground breaking innovation in rectifier technology that uniquely captures the benefits provided by the pn-junction diode and the Schottky Barrier diode and integrates them into a single component. State-of-the-art integrated circuit wafer processing technology has allowed the design and manufacturability of a device, which is able to integrate and improve the benefits of the two existing rectifier technologies into a single device.

For quantities of 500 and up, call for quote.

EUPEC IGBT MODULES

Features:
- Voltage Controlled MOS Input
- N-Channel
- Isolated Copper Baseplate

Applications:
- Inductive Heating
- DC Choppers
- Electronic Welding
- Uninterruptible Power Supplies
- DC Servo and Robot Drives
- General Power Switching Applications

For quantities of 20 and up, call for quote.

EUPEC IGBT POWER INTERGRATED MODULES

Features:
- High Level Power Integration
- Integrated Temperature Sensor
- High Power Density, Low Losses

Applications:
- Three Phase Motor Drive Inverter
- Converter
- General Power Switching Supplies

TAIWAN SEMICONDUCTOR ZENER DIODES

Specifications:

- Max. Rev. Leakage at VWM, ID of 5μA
- -55~+150°C Operating and Storage Temperature Range

For quantities of 2500 and up, call for quote.

LOW LEAKAGE DIODES

RoHS Compliant

The PAD/JPAD/SSTPAD series of extremely low-leakage diodes provides a superior alternative to conventional diode technology when reverse current (leakage) must be minimized. They feature leakage currents ranging from –1 pA (PAD1) to –100 pA (SSTPAD100) to support a wide range of applications. These devices are well suited for use in applications such as input protection for operational amplifiers. The hermetically sealed TO-206AF (TO-72) package allows full military processing per MIL-S-19500. The TO-226A (TO-92) plastic package provides a low-cost option. The TO-236 (SOT-23) package provides surface-mount capability.

For quantities of 2000 and up, call for quote.

CURRENT REGULATOR DIODES

RoHS Compliant

These current regulators are designed for demanding applications in test equipment and instrumentation. These devices utilize the JFET techniques to produce a device which is extremely simple to operate. With nominal current ranges from 0.24 mA to 4.7 mA, these devices will meet a wide array of design requirements. These come in the low-cost TO-92 and SOT-23 package for cost-effective design solutions and the TO-18 hermetically sealed package for high reliability designs.

For quantities of 2000 and up, call for quote.

ZETEX SEMICONDUCTORS

NEW FROM SUPPLIER

RoHS Compliant

ZETEX SCHOTTKY BARRIER DIODES

Zetex schottky barrier diodes offer the combined benefits of an excellent high performance specification in miniature surface mount packages. An optimized geometry / process with superior packaging gives an unmatched IF/VF performance and PD capability, enabling significant space savings, circuit efficiencies and cost effective solutions to larger package options

Features:
- Low forward voltage
- High current capability
- Fast recovery time
- Miniature package size

Applications:
- DC-DC conversion
- Distributed and auxiliary supplies
- High frequency rectification
- Mobile telecommunications, PCMCIA (flashcards) and SCSI LAN PSUs
- Charger circuits

ZETEX LOW LEAKAGE SCHOTTKY RECTIFIER DIODES

Zetex has strengthened its current Schottky range with the introduction of 4 new surface mount, high current, very low leakage, fast switching Schottky diodes which complement the existing low VF, ZHCS series (ideal for lower temperature operation). These new low leakage diodes are ideally suited to address applications requiring efficient operation at higher temperatures, often a significant limitation of conventional Schottky types. The ZLLS series diodes are provided in choice of packages which relate directly to die size and IF performance ensuring that designers have the optimum choice of package size / performance / cost.

Features:
- VR - 40V
- Very low VF at high temperature operation (above 85°C)
- Very low leakage capability in all packages
- High temperature operation of ZLLS diodes compliment the existing range of ZHCS series (optimized for operation at lower temperatures)

Applications:
- Automotive power conversion
- DC conversion (telecom DC modules)
- Charging circuits
- High frequency rectification
- Motor control
- Battery powered equipment

ZETEX LOW VOLTAGE HYPERABRUPT VARACTOR DIODES

The 950 series of low voltage octave tuning or hyperabrupt diodes are particularly suited to applications with 3 volt supplies

Features:
- VHF-UHF operation
- Close tolerance CV characteristics
- High tuning ratio
- High Q

Applications:
- Phase locked VCO systems
- Battery powered systems including DAB receiver modules
- VCXO in ADSL modem chipsets

♦ **Surface Mount**

ZETEX 12 AND 25 VOLTAGE HYPERABRUPT VARACTOR DIODES

Features:
- Close tolerance C-V characteristics
- High tuning ratio
- Low IR (typically 200pA)
- Excellent phase noise performance
- High Q
- Range of miniature surface mount packages

Applications:
- VCXO and TCXO
- Wireless communications
- Pagers
- Mobile radio

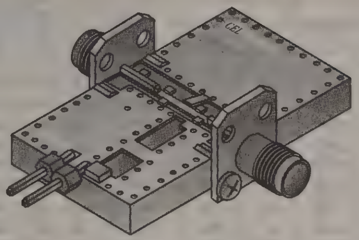
CEL RF Transistor Evaluation Boards

Evaluation boards help speed the design process by providing our customers with good examples of working circuit designs. Prototypes are designed, etched and tested in the engineering facility at California Eastern Laboratories.

Features:
- Layout is done in AutoCad®
- Boards are produced on FR4 board material to simulate the production environment
- RF and IF inputs and outputs are ported through SMA connectors
- DC connections are through header pins
- On-board bypass capacitors are provided
- Includes assembly drawings, schematics, datasheet and typical test data

Transistor evaluation boards have been designed for use at industry standard frequencies (900 MHz, 1.9 GHz, 2.4 GHz, etc.) and have been optimized for a variety of specifications (Noise Figure, Gain, Power or Intercept Point).



(Small Signal GaAs Field Effect Transistor Shown)

CEL SMALL SIGNAL SILICON BIPOLAR TRANSISTORS

Low Current, Low Voltage Applications

MOUSER STOCK NO.	Description	Price Each
NE662M04-EVGA09	For evaluation of NE662M04-A, optimized for gain at 900MHz	108.00

ALD Precision Matched Small Signal MOSFET Arrays

RoHS Compliant **This page of product is compliant.**

ADVANCED
LINEAR
DEVICES, INC.

- Low Threshold Voltage
- Patented EPAD® Technology
- Near Infinite Current Gain
- Ideal Current Sources and Current Mirrors
- Temperature Range: 0 to 70°C
- Drain Source Breakdown: 10V Min.
- Drain Source on Resistance Match: 0.5% Typ.
- Low Voltage and Nanopower Circuits

ALD N-CHANNEL ENHANCEMENT MODE

FAIRCHILD Power MOSFETs

Products may be RoHS compliant.
Check mouser.com for RoHS status.

FAIRCHILD
SEMICONDUCTOR™

FAIRCHILD MEDIUM POWER MOSFETS (CONT.)

◆ Surface Mount Device

For quantities of 500 and up, call for quote.

SUPERTEX DEPLETION MODE N-CHANNEL MOSFETS

Advanced Vertical DMOS Technology N-Channel Depletion Mode Vertical DMOS FETs

These depletion-mode (normally-on) transistors utilize an advanced vertical DMOS structure and Supertex's well-proven silicon-gate manufacturing process. This combination produces devices with the power handling capabilities of bipolar transistors and with the high input impedance and positive temperature coefficient inherent in MOS devices. Characteristic of all MOS structure, these devices are free from thermal runaway and thermally-induced secondary breakdown.

Supertex's vertical DMOS FETs are ideally suited to a wide range of switching and amplifying applications where high breakdown voltage, high input impedance, low input capacitance, and fast switching speeds are desired.

Features:
- High input impedance
- Low input capacitance
- Fast switching speeds
- Low on resistance
- Free from secondary breakdown
- Low input and output leakage

Applications:
- Normally-on switches
- Solid state relays
- Converters
- Constant current sources
- Power supply circuits
- Telecom

For quantities 2000 and up, call for quote.

Advanced Lateral DMOS Technology N-Channel Depletion Mode MOSFETs

The LND1 and LND2 are high voltage N-channel depletion-mode (normally-on) transistors utilizing Supertex's lateral DMOS technology. The gate is ESD protected. The LND1 and LND2 are ideal for high voltage applications in the areas of normally-on switches, precision constant current sources, voltage ramp generation and amplification.

Features:
- High input impedance and low CISS
- Low power drive requirement
- ESD gate protection
- Ease of paralleling
- Free from secondary breakdown
- Excellent thermal stability
- Integral source-drain diode

Applications:
- Normally-on switches
- Solid state relays
- Converters
- Constant current sources
- Power supply circuits
- Input protection circuits

For quantities 2000 and up, call for quote.

TO-263

TSSOP-8

N-CHANNEL TRENCHFET MOSFETS (SINGLE CONFIGURATION) (CONT.)

RoHS Compliant

These TrenchFET power MOSFETs provide efficient power control with extremely low on-resistance.

For quantities of 1000 and up, call for quote.

BOURNS
Reliable Electronic Solutions

BOURNS TISP THYRISTOR OVERVOLTAGE PROTECTORS

Continuing to provide the most complete solutions to your circuit protection needs, Bourns recently introduced the TISP® line of products. The TISP® products are specially designed to provide protection for telecommunications equipment in instances where high voltages occur as a result of lightning strikes, power line crosses or a/c power surges. Coupled with Bourns' Multifuse® PPTC overcurrent protectors and Bourns, Line Protection Networks, the TISP® products offer telecom customers a more comprehensive total protection product line.

Dual Bidirectional Thyristor Surge Protector

This TISP® device series protects central office, access and customer premise equipment against overvoltages on the telecom line. These devices are housed in a through-hole-3-pin single-in-line (SL) plastic package.

RoHS Compliant

For quantities of 200 and up, call for quote.

Bidirectional Thyristor Surge Protector

This TISP® device series protects central office, access and customer premise equipment against overvoltages on the telecom line. These devices are housed in a through-hole DO-92 package (TO-92 package with cropped center leg).

RoHS Compliant

For quantities of 200 and up, call for quote.

Quad-Forward-Conducting Buffered P-Gate Thyristor

This small-outline package consists of a circuit mounted on a lead frame and encapsulated within a plastic compound. The compound will withstand soldering temperature with no deformation, and circuit performance characteristics will remain stable when operated in high humidity conditions. Leads require no additional cleaning or processing when used in soldered assembly.

Independent Overvoltage Protection for Two SLICs in Short Loop Applications:

- Wide 0 to -90 V Programming Range
- Low 5 mA max. Gate Triggering Current
- High 150 mA min. (85°C) Holding Current
- Specified 1.2/50 & 0.5/700 Limiting Voltage
- Full -40°C to 85°C Temperature Range

RoHS Compliant

For quantities of 200 and up, call for quote.

Very Low Voltage Bidirectional Thyristor Overvoltage Protectors

This surface mount package consists of a circuit mounted on a lead frame and encapsulated within a plastic compound. The compound will withstand soldering temperature with no deformation, and circuit performance characteristics will remain stable when operated in high humidity conditions. Leads require no additional cleaning or processing when used in soldered assembly.

RoHS Compliant

For quantities of 500 and up, call for quote.

Coupled with Bourns' Multifuse® PPTC overcurrent protectors and Bourns, Line Protection Networks, the TISP® products offer telecom customers a more comprehensive total protection product line.

Bidirectional Thyristor Overvoltage Protectors

This surface mount package consists of a circuit mounted on a lead frame and encapsulated within a plastic compound. The compound will withstand soldering temperature with no deformation, and circuit performance characteristics will remain stable when operated in high humidity conditions. Leads require no additional cleaning or processing when used in soldered assembly.

RoHS Compliant

For quantities of 200 and up, call for quote.

Medium and High-Voltage Triple Element Bidirectional Thyristor Overvoltage Protectors

This small-outline package consists of a circuit mounted on a lead frame and encapsulated within a plastic compound. The compound will withstand soldering temperature with no deformation, and circuit performance characteristics will remain stable when operated in high humidity conditions. Leads require no additional cleaning or processing when used in soldered assembly.

This TISP7xxxF3 series are 3-point overvoltage protectors designed for protecting against metallic (differential mode) and simultaneous longitudinal (common mode) surges. Each terminal pair as the same voltage limiting values and surge current capability. This terminal pair surge capability ensures that the protector can meet the simultaneous longitudinal surge requirement which is typically twice the metallic surge requirement.

RoHS Compliant

For quantities of 200 and up, call for quote.

Triple Element Bidirectional Thyristor Overvoltage Protectors

This single-in-line package consists of a circuit mounted on a lead frame and encapsulated within a plastic compound. The compound will withstand soldering temperature with no deformation, and circuit performance characteristics will remain stable when operated in high humidity conditions. Leads require no additional cleaning or processing when used in soldered assembly.

RoHS Compliant

For quantities of 200 and up, call for quote.

Dual Forward-Conducting P-Gate Thyristor Programmable Overvoltage Protectors

This small-outline package consists of a circuit mounted on a lead frame and encapsulated within a plastic compound. The compound will withstand soldering temperature with no deformation, and circuit performance characteristics will remain stable when operated in high humidity conditions. Leads require no additional cleaning or processing when used in soldered assembly.

This TISP61089B is a dual forward-conducting buffered p-gate thyristor (SCR) overvoltage protector. It is designed to protect monolithic SLICs (Subscriber Line Interface Circuits) against overvoltages on the telephone line caused by lightning, a/c power contact and induction. The TISP61089B limits voltages that exceed the SLIC supply rail voltage. The TISP61089B parameters are specified to allow equipment compliance with Bell core GR-1089-CORE, Issue 2 and ITU-T recommendations K.20, K.21 and K.45.

RoHS Compliant

For quantities of 200 and up, call for quote.

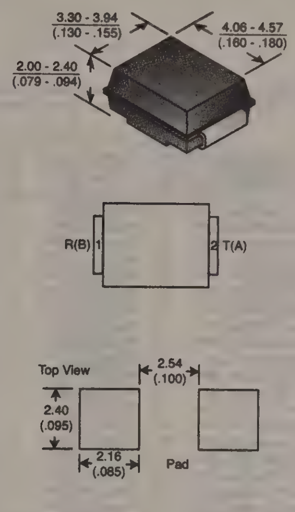
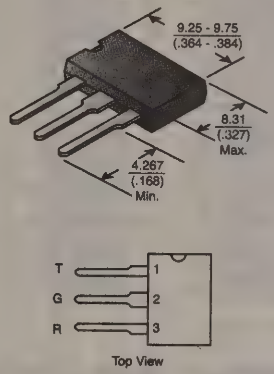
DIMENSIONS: mm (in.)

A



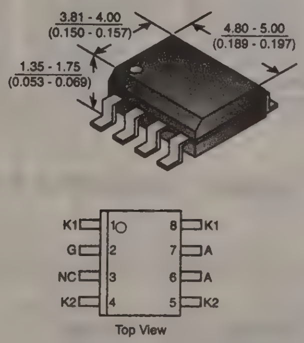
B



NOTES:

- A. Each pin centerline is located within 0.25 (0.010 of its true longitudinal position.
- B. Body molding flash of up to 0.15 (0.006) may occur in the package lead plane.

C



NOTES:

- A. Leads are within 0.25 (0.010) radius of true position at maximum material condition.
- B. Body dimensions do not include mold flash or protrusion.
- C. Mold flash or protrusion shall not exceed 0.15 (0.006).
- D. Lead tips to be planar within ±0.051 (0.002).

MICROCAPACITANCE (MC) SC SIDACTOR DEVICES

RoHS Compliant

These DO-214AA SCMC SIDACtor devices are intended for applications sensitive to load values. Typically, high speed connections, such as xDSL and T1/E1, require a lower capacitance. CO values for the MicroCapacitance device are 40 percent lower than a standard SC part.

For quantities of 50 and up, call for quote.

TRANSFEED™ MULTILAYER CERAMIC TRANSIENT VOLTAGE SUPPRESSORS

AVX has combined the best electrical characteristics of its TransGuard™ Transient Voltage Suppressors (TVS) and its Feedthru Capacitors into a single chip for state-of-the-art overvoltage circuit protection and EMI reduction over a broad range of frequencies. This unique combination of multilayer ceramic construction in a feedthru configuration gives the circuit designer a single 0805 chip that responds to transient events faster than any TVS device on the market today, and provides significant EMI attenuation when in the off-state.

Where designers are concerned with both transient voltage protection and EMI attenuation, either due to the electrical performance of their circuits or due to required compliance to specific EMC regulations, the TransFeed™ product is an ideal choice.

Applications:

- Fingerprint ID Circuit
- Magnetic Field Circuit
- LCD Dashboard Driver

MULTIGUARD™ MULTILAYER CERAMIC TRANSIENT VOLTAGE SUPPRESSION ARRAYS

LEAD-FREE

AVX's Transient Voltage Suppression (TVS) Arrays address six trends in today's electronic circuits: (1) mandatory ESD protection, (2) mandatory EMI control, (3) signal integrity improvement, (4) PCB downsizing, (5) reduced component placement costs, and (6) protection from induced slow speed transient voltages and currents.

AVX TransGuard™ Ceramic Transient Voltage Suppressors

The AVX TransGuard™ Transient Voltage Suppressors (TVS) with unique high-energy multilayer construction represents state-of-the-art overvoltage circuit protection. Monolithic multilayer construction provides protection from voltage transients caused by ESD, lightning, Nuclear Explosion Magnetic Pulse (NEMP), inductive switching, etc. True surface mount product is provided in EIA industry standard packages.

TransGuard products are zinc oxide (ZnO) based ceramic semiconductor devices with non-linear voltage-current characteristics (bi-directional) similar to back-to-back zener diodes.
They have the added advantage of greater current and energy handling capabilities as well as EMI/RFI attenuation. Devices are fabricated by ceramic sintering process that yields a structure of conductive ZnO grains surrounded by electrically insulating barriers, creating varistor-like behavior.

RoHS Compliant

Marking
All standard surface mount TransGuard chips are unmarked.

Features:

- Ni/Sn Alloy(Plated)
- Operation temp: -55°C to +125°C
- Meets IEC 1000 -4 specifications

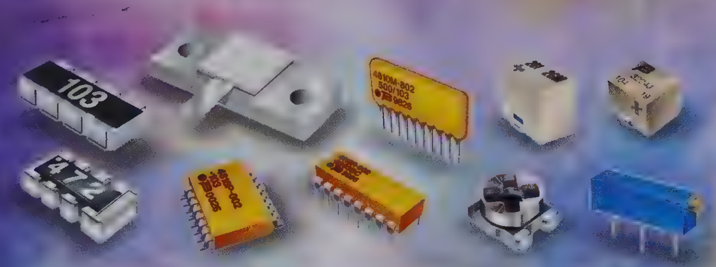
Reliable Electronic Solutions

Your Source for Reliable Electronic Solutions

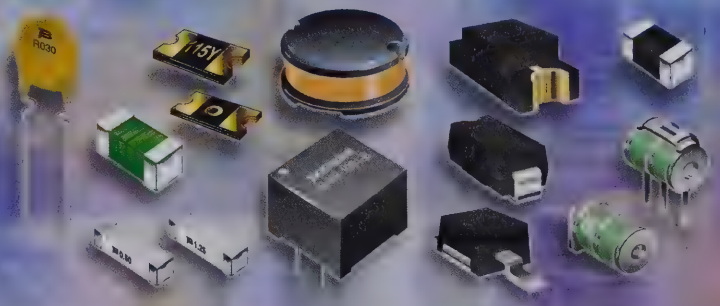


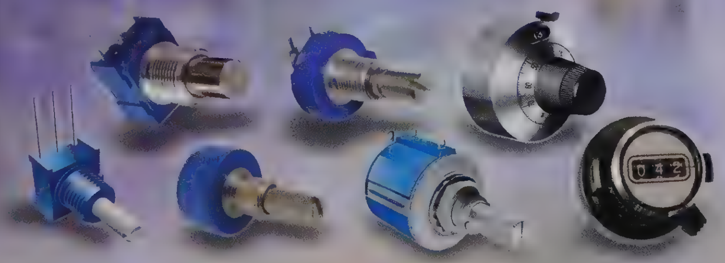
Resistive Products

- *Chip Resistors & Arrays, Pgs. 519-522*
- *Power Resistors, Pg. 540*
- *Resistor Networks, Pgs. 519-522*
- *Trimmers, Pgs. 585-590, 599-601*

Circuit Protection Products

- *Gas Discharge Tubes, Pgs. 486-487*
- *Magnetics, Pgs. 822-829*
- *Resettable Fuses, Pg. 495*





Sensors & Controls Products

- *Panel Controls, Pgs. 567-568*
- *Precision Controls, Pgs. 567-568*
- *Dials, Pg. 568*

For over 60 years, Bourns has been a leading global source for a wide range of technology-driven electronic components including resistive components, circuit protection devices, sensors, and controls. Bourns' outstanding quality products serve in a broad range of markets including the telecom, computer, industrial, automotive, consumer, medical industries, and more.

Experience Mouser's time-to-market advantage! Our vast selection of the NEWEST products, NEWEST technologies, **new catalog every 90 days**, no minimums, and same-day shipping on most orders, gets you to market faster. We make it easy to do business with Mouser! For more information or to purchase Bourns products online, visit *www.mouser.com/bourns* today!

METAL OXIDE VARISTORS HEAVY DUTY APPLICATIONS ("P SERIES")

Features:

- "P Series" are especially dedicated to heavy duty applications encountered in the AC power network. Higher surge current and energy ratings provide an improved protection and a better reliability
- Radial lead varistors
- Operating voltage range from 130 V to 625 V (Vrms for VE types) or 205 V to 1000 V (V1mA for VF types)
- Available in tape and reel for use with automatic insertion equipment

* VE13: For models with $V_{RMS} \leq 320$ V other version/suffixes available with:
E = 5.08 (0.20) Suffix:
Ø = 0.6 (.024) Bulk: HB
D = 12.5 (.492) max Tape: DA, DB, DC, DD, DQ, ...

**VE24: For lead diameter = 1.0 (.039), please consult us.

Specifications:

- Storage temperature: -40°C to +125°C
- Max. operating temperature: +85°C
- Response time: < 25 ns
- Voltage coefficient temp.: lKl < 0.09%/°C
- Voltage proof: 2500 V
- Epoxy coating: Flame retardant UL94-VO
- Tolerance 10%

RoHS Compliant

VE TYPE METAL OXIDE VARISTORS ("M SERIES")

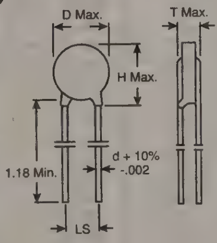
Applications:

- Transient suppression in automotive environments (such as ignition pulses, alternator field, mutual harness coupling, inductive load switching fan, heater and booster starts)
- Consumer appliances connected to 110 or 220 VAC lines
- Protection of expensive semiconductor components
- Protection of industrial equipment and motors endangered by AC line transients (computers, traffic controls, ground fault interrupters, etc.)
- Protection of equipment connected to telephone or signal lines, such as railroad and communications equipment, security and fire alarm systems
- Voltage regulation and ARC suppression across relay contacts
- Additional uses are found in instrumentation to protect input terminals from encountering destructive high voltages

Features:

- Superior response time of less than 25 ns
- Maximum clamping voltage up to 1350V
- Superior clamping characteristics
- Three different case sizes
- Voltage range from 48 through 510 VRMS
- Polycrystalline zinc oxide dielectric
- Standardized lead spacings
- Tolerance 10%

**VE24: For lead diameter = 1.0 (.039), please consult us.



RoHS Compliant

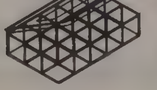
METAL OXIDE VARISTOR KIT

The 30 piece kit contains 2 of the VZC Series, 2 of the VZD Series, 3 of the VZA Series, and 3 of the VZC Series. For a Customized Kit with other values, please contact a Mouser Customer Service Representative.

Contains:

3 each, VZA Series: 48, 130, 150 (Vrms)
3 each, VZC Series: 130, 150 (Vrms)
2 each, VZC Series: 250 (Vrms)
2 each, VZD Series: 130, 150, 275, 510 (Vrms)



For quantities greater than listed, call for quote.

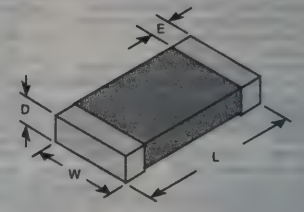
Littelfuse® SURFACE MOUNT ML SERIES VARISTORS

The ML Series family of Transient Voltage Surge Suppressions devices is based on the Littelfuse Multilayer fabrication technology.
These components are designed to suppress a variety of transient events, including those specified in IEC 61000-4-2 or other standards used for Electromagnetic Compliance (EMC).
The ML Series is typically applied to protect integrated circuits and other components at the circuit board level.

RoHS Compliant



Features:

- Leadless Chip Size: 0603, 0805, 1206 and 1210
- Multilayer Ceramic Construction Technology
- Operating Temperature Range: -55°C to +125°C
- Operating Voltage Range: V_M(DC) = 5.5V to 120V

Applications:

- Suppression of inductive switching or other transient events such as EFT
- Provides on-board transient voltage protection for ICs and transistors
- Used to help achieve electromagnetic compliance of end products
- Replace larger surface mount TVS Zeners in many applications

LITTELFUSE METAL OXIDE VARISTORS ZA SERIES

- Wide Operating Voltage Range Vm (AC) MS: 4V to 460V
- DC Voltage Ratings: 5.5V to 615V
- No Derating up to 85°C Ambient
- 5 Model Sizes Available: 5,7,10,14 and 20mm
- Radial-Lead Package Design

The ZA Series of transient voltage surge suppressors are radial-lead varistors (MOVs) designed for use in the protection of low and medium voltage circuits and systems. Typical applications include motor control, telecom, automotive systems, solenoid, and power supply circuits to protect circuit board components and maintain data integrity.

✱ Energy rating for impulse duration of 30ms minimum to one half of peak current (auto load dump). ✱✱ 10mA DC test current.

For quantities of 500 and up, call for quote.

LITTELFUSE METAL OXIDE VARISTORS LA SERIES

- Wide voltage / energy range
- Excellent clamp ratio
- Fast response time
- Low standby power
- No follow-on current
- Radial package
- Line voltage operation
- UL recognized

Littelfuse varistors are voltage dependent, symmetrical, metal-oxide semiconductor devices. Their characteristics enable them to protect against high transient voltage spikes (when properly selected) to meet anticipated loads. When the protected equipment or circuit encounters high voltage spikes, the varistor impedance changes from a very high standby value to a very low conducting value, thus clamping the transient voltage to a protective level. The excess energy of the incoming high voltage pulse is absorbed by the Harris varistor, protecting voltage sensitive components against damage.

For quantities of 500 and up, call for quote.

RAYCHEM Metal Oxide Varistors

RoHS Compliant **This page of product is compliant.**

RAYCHEM VARISTORS

Raychem's ROV (Radial-leaded Metal Oxide Varistor) products help to provide protection against overvoltage faults such as lightning, power contact, and power induction, for a wide variety of power systems. Suitable for a broad range of applications including, but not limited to, security systems, power supplies, surge strips, motors, and telecommunications equipment, ROV devices help to protect valuable equipment from potential power surge damage by clamping high-energy, short duration impulses. The ROV devices have high current handling and energy absorption capability and fast response times to help protect against transient faults.

RoHS Compliant

For quantities of 2,500 and up, call for quote.

VISHAY BC COMPONENTS Radial Leaded Metal Oxide Varistors

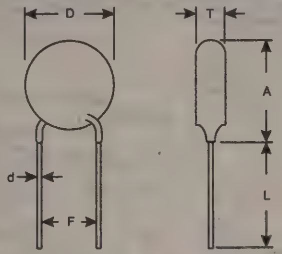
RoHS Compliant **This page of product is compliant.**

VISHAY 2381 59x xxxx SERIES

The varistors consist of a disc of ceramic material with two tinned solid copper leads.

They are coated with a layer of epoxy, which provides electrical, mechanical, and climactic protection. The encapsulation is resistant to all cleaning solvents in accordance with "IEC 60068-2-45".

Features:
- Zinc oxide disc, epoxy coated
- Non-flammable
- Lead Free



LEAD-FREE

RoHS Compliant

BOURNS Gas Discharge Tubes

Reliable Electronic Solutions

1669 SERIES TRANSIENT PROTECTOR

DIMENSIONS: mm (In.)

Used for full weather protection of field transmitters and instrumentation operating on 24-28V systems, the 1669 Series protects sensitive I/O circuitry from surges of any polarity or magnitude. Principal use is on 4-20 mA control loops and can be used on grounded (+ or -) or ungrounded circuits. Able to survive and protect even from direct lightning strikes to the transmitter ground or field wiring. Automatic recovery after passage of the surge. Construction is hybrid 3-stage design, using a high surge capacity Balanced Trigard® Gas Tube protector, coordination impedance and silicon suppressors to provide differential and common mode protection with very low clamping levels for delicate loads. The housing is thick walled schedule 40, type 303 stainless steel Wiring is #20 (.5 mm2) 1000V, PVC insulated Solid red and black colors are used for the input; striped colors signify the protected output. The protector ground wire (green) is electrically bonded to the metallic housing; it is for connection to the grounding screw within the field device. Intrinsically Safe (IS) and Flame Proof (FP) versions available conforming to EU Atex Directive 94/9/EC IS version II 1 G Certificate No SIRA99ATEX2154X, EEx ia IIC T4 (P1=1.13W) T5 (P1=0.73W) FP version II 2 G Certificate No. SIRA99ATEX1143X, EEx d IIC T6 Ta=55C Use Model 1669-02/06 for standard ground resistance conditions. Use Model 1669-01 / 05 with higher voltage isolation to ground for sites with high resistance soil conditions or where significant ground potential differences are known to exist.

Characteristics:

- Ambient Temperature Range, Storage: -65°C to +130°C
- Operating Temperature: Non-hazardous areas: -40°C to +100°C; Hazardous areas: -20°C to + 55°C
- Maximum Load Current: 150 mA Except when limited for T5 conditions (.73W) 129 mA
- Component Response Time: <1 ns
- Surge Life (L+L)-G: 20 kA 8/20 μs: 20 times; 1 kA 10/1000μs: 1000 times

Features:

- Fits single or dual conduit ports
- Intrinsically Safe (IS) and Flameproof (FP) models available
- Weatherproof
- Long life, high operational reliability
- Stainless steel construction

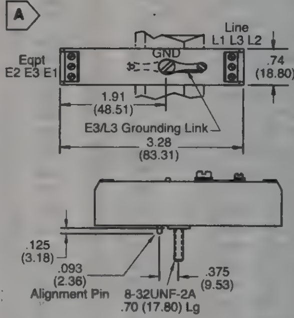
Reliable Electronic Solutions

1800 SERIES SIGNAL AND DATALINE PROTECTOR

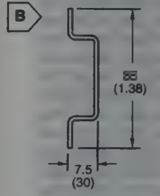
DIMENSIONS: mm (In.)

Bourns 1800 Series Signal and Dataline Protectors are designed to protect sensitive electronic circuits and components from damaging surge voltages and currents. Their extremely fast response and low clamping voltages make them particularly suitable for the protection of signal and data lines associated with computer, data communication, instrumentation, broadcasting and industrial controls. They may be used directly with EIA standard interfaces RS-232, RS-422, RS-423, RS-485 and with 20mA and 50mA instrumentation loops. Model 1800 Series Signal and Dataline Protectors are fast, rugged and capable of protecting against fast rising voltage transients as well as the severe current surges associated with lightning discharges. Method of Operation: Bourns 1800 Series are heavy-duty, multi-staged protectors. A solid-state section intercepts the leading edge of the surge with subnanosecond response time. Within microseconds a 3-pole common chambered Gas Tube capable of handling 200,000 ampere lightning currents operates and crowbars the surge to ground. The protector remains in the crowbar state until the surge has passed and line voltages return to safe levels, then automatically restores the line to normal operation. There is no need for resetting a breaker or replacing a fuse. Application: Protectors are generally placed at each end of a signal or data line or current loop. In the case of daisy-chain configurations (such as RS-485), protectors are placed at each node. 1820 models provide both line-to-ground and line-to-line protection and are designed to use on differential signals (such as RS-422 or RS-485) and most current loops. 1810 models provide line-to-ground protection for two separate circuits and are designed for use on ground referenced signals (such as RS-232) and 4-20 mA loops where the return wire is grounded at the protector. The 1811 and 1821 models provide the same protection modes for high frequency applications. Related Bourns Protectors: For outdoor applications with 1/2 inch NPT ports (such as field-mounted 4-20mA transmitters), please refer to Bourns 1669 Series Protector. In this application, the mixed use of an 1800 Series Protector at the controller and a 1669 Series Protector at the field is recommended.

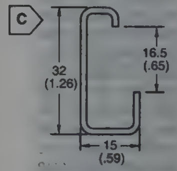
A



B



C



Characteristics:

- Surge Life:
  - >100 operations with 200 Amps: 10 x 1000 μsec
  - >10 operations with 10,000 Amps: 8 x 20 μsec
- DC Leakage Current at Rated L/G Voltage: >10 μAmps
- Signal/Data Attenuation at Maximum Data Rate: 3db with 600 Ω termination
- Operating Temperature: -40°C to + 60°C
- Response Time: 50 pico-seconds
- Wire Size: 22-14 AWG

Features:

- Low peak clamping voltage even during severe current surges
- Ability to repeatedly protect against surge currents in excess of 10,000 amperes
- Convenient mounting and grounding to any flat surface or to Din 1 (TS-32) or DIN-3 (TS-35) rail
- Cable shields are passed through and may be either grounded or not grounded at the protector
- Vibration-proof screw-type clamp terminals
- Flame-resistant epoxy-filled housing

For quantities of 50 and up, call for quote.

2027 SERIES - 2-POLE GAS DISCHARGE TUBE

DIMENSIONS: mm (In.)

Characteristics:

- DC Holdover Voltage 1: 135 V (52 V for Model 2027-09, 80 V for Model 2027-15)/< 150 ms
- Impulse Discharge Current: 25000 A, 8/20 μs 2/1 operation minimum; 10000 A, 8/20 μs/> 10 operations; 500 A, 10/1000 μs/> 400 operations; 100 A, 10/1000 μs or 10/700 μs/> 1000 operations
- Alternating Discharge Current: 65 Arms, 11 cycles 2; 1 operation minimum
- Operating Temperature: -55°C to +250°C

Features:

- 8mm diameter, 6mm long
- UL recognized
- Custom configurations available
- High surge current rating
- Stable breakdown throughout life

Applications:

- Telecommunications
- Industrial electronics
- Commercial electronics
- Consumer electronics
- Automotive, aircraft, military electronics

For quantities greater than 1000, call for quote.

SURGE PROTECTOR TEST SET FOR GAS DISCHARGE TUBES

DIMENSIONS: mm (In.)

Features:

- Lightweight, hand-held design
- Easy to read LCD display
- Simple operation
- High accuracy peak reading circuit
- Wide 10-1000V Test Range
- Precise auto-sensing shutoff

Applications (Suitable for Testing):

- Gas Tubes
- Carbon Gaps
- MOVs
- Zener and avalanche diodes
- Thyristor devices
- Finished product

BOURNS Gas Discharge Tubes

Reliable Electronic Solutions

2035 SERIES PRECISION GAS DISCHARGE TUBE SURGE PROTECTOR

Bourns now offers a surface mount (SM) 2-electrode GDT surge protection device. The industry-leading quality and features of the Bourns® miniature 2035 Series GDT continue in this new SM version. Compatible with "pick and place" assembly systems, the SM is ideal for high-density applications such as PCBs for telecommunications, commercial and industrial applications.

Specifications :

- Insulation Resistance: 100V (50V for 2035-09); >10^{10}Ω
- Glow Voltage: 10 mA; -70V
- Arc Voltage: >1A; -10V
- Glow-Arc Transition Current: <0.5A
- Capacitance: 1 MHz; <1 pF
- DC Holdover Voltage: >135V, (52V for 2035-09, 80V for 2035-15); <150ms
- Impulse Discharge Current:
  20000A, 8/20μs^2; 1 operation min.
  5000A, 8/20μs; >10 operations
  100A, 10/1000μs; >300 operations
  100A, 10/700μs; >500 operations
- Alternating Discharge Current:
  20Arms, 11 cycles^2; 1 operation min.
  5Arms, 1s; >10 operations
- Operating Temperature: -55 to 80°C

Features:

- Leadless, surface mount for economical assembly
- Compact mini-size
- High surge current rating
- Low capacitance and insertion loss
- Stable breakdown throughout life
- UL recognition pending

Sparkover limits after life ±20% (-25%, +30% for 2035-09, 2035-60, IR>10^8Ω
1-Network applied
2-Tube may exceed ±0% but will continue to protect without venting

For quantities greater than 1000, call for quote.

Reliable Electronic Solutions

2035/2037 SERIES MINIATURE 2-POLE GAS DISCHARGE TUBE

Specifications:

- Single Impulse AC Discharge Current (A): 20 Arms
- AC follow current (Apeak): 5 Arms
- Impulse Life (No. of Pulses): 100 A, 10/1000 μs >300 operations
- Impulse Life (No. of Pulses): 100 A, 10/700 μs >500 operations

Features:

- 5mm diameter, 4mm long (2035 series)
- 5mm diameter, 5mm long (2037 series)
- UL recognized
- High surge current rating
- Stable breakdown throughout life

Applications:

- Telecommunications
- Industrial electronics
- Commercial electronics
- Consumer electronics
- Automotive, aircraft, military electronics

For quantities greater than 1000, call for quote.

Reliable Electronic Solutions

2026 SERIES 3-POLE GAS DISCHARGE TUBE

Characteristics:

- Single Impulse AC Discharge Current (A): 130 Arms
- AC follow current (Apeak): 20 Arms
- Impulse Life (No. of Pulses): 20 kA, 8/20 μs >10 operations
- Impulse Life (No. Oof Pulses): 1 kA, 10/1000 μs >400 operations

Features:

- Balanced TRIGARD®
- 8mm diameter, 11mm long
- UL recognized
- Custom configurations available
- High surge current rating
- Stable breakdown throughout life

Applications:

- Telecommunications
- Industrial electronics
- Commercial electronics
- Consumer electronics
- Automotive, aircraft, military electronics

For quantities greater than 1000, call for quote.

LITTELFUSE Greentube™ Gas Plasma Arresters

Littelfuse

(High Performance Beta Range)

RoHS Compliant This page of product is compliant.

LITTELFUSE SL1002 SURFACE MOUNT SERIES

Features:

- RoHS compliant
- Ultra Low Insertion Loss
- Surface mountable
- 5KA surge capability tested with 8/20μS pulse as defined by IEC 61000-4-5
- Excellent response to fast rising transients.
- Can be used to meet Telcordia GR1089 without series resistance
- 10/700 6KV capability, as per ITUT k.21, enhanced test level
- 2000 Amp 2/10μS surge rating
- Meets FCC part 68 10/160μs waveform, 200A test and 10/560μs waveform 100A test.

Mechanical Specifications:

- Weight: 0.63g (0.022 oz.)
- Materials: Electrode Base: Nickel Iron Alloy
- Electrode Plating: Bright Sn
- Body: Ceramic
- Device Marking: 'LF' logo, Voltage and date code

Applications:

- Broadband equipment
- ADSL equipment
- XDSL equipment
- Satellite and CATV equipment
- General telecom equipment

RoHS Compliant

LITTELFUSE SL1024A SERIES

Features:

- RoHS compliant
- Low insertion loss
- Excellent response to fast rising transients.
- Ultra low capacitance.
- 10KA surge capability tested with 8/20μs pulse as defined by IEC 61000-4-5
- Available with thermal failsafe option (add 'F' or 'S' suffix topart number)

Applications:

- Broadband equipment.
- ADSL equipment.
- XDSL equipment.
- Satellite and CATV equipment.
- Splitters
- General telecom equipment.

RoHS Compliant

LITTELFUSE SL0902A SURFACE MOUNT SERIES - BROADBAND OPTIMISED™

Features:

- 2.5KA surge capability tested with 8/20mS pulse as defined by IEC 100-4-5
- Excellent stability on multiple pulse duty cycle.
- Excellent response to fast rising transients.
- Surface mountable
- GHz working frequency

Applications:

- Broadband equipment.
- ADSL equipment, Incl. ADSL2+.
- XDSL equipment.
- Satellite and CATV equipment.
- General telecom equipment.

RoHS Compliant

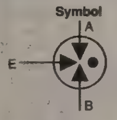
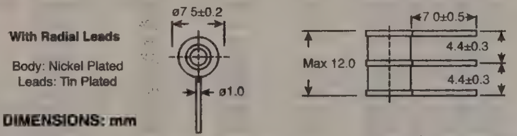
- 300 Time Impulse Life, at 10/1000μs, 400A
- ≥1,000MΩ Insulation Resistance
- ≤1.0pF Capacitance @ 1MHz





With Radial Leads
Body: Nickel Plated
Leads: Tin Plated
ø7.5±0.2
ø1.0
7.0±0.5
Max 12.0
4.4±0.3
4.4±0.3
DIMENSIONS: mm

For quantities of 1000 and up, call for quote.

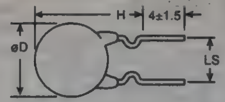
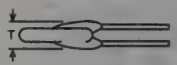
MURATA PTC and NTC Thermistors

RoHS Compliant **This page of product is compliant.**

MURATA POSISTOR® THROUGH-HOLE THERMISTORS

Features:
- Resistance tolerance: ±10%
- Narrow current range
- Quick operating time
- Restores the original low resistance value automatically once the overload is removed
- Non-contact design leads to long life and no noise





RoHS Compliant

For quantities of 1000 and up, call for quote.

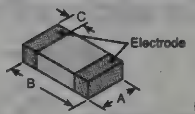
MURATA NTC CHIP THERMISTORS FOR TEMPERATURE COMPENSATION

Features:
- Lead Free
- Excellent solderability and high stability in environment
- Excellent long time aging stability
- High accuracy in resistance and B-constant
- Operating Temperature: -40°C to +125°C



RoHS Compliant

For quantities of 1000 and up, call for quote.

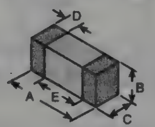
MURATA POSISTOR® PTC CHIP THERMISTORS CIRCUIT PROTECTION FOR OVERCURRENT PROTECTION

Overcurrent protection device with resettable function suitable for current limiting resistor. This product is chip type PTC thermistor for overcurrent protection. Suitable for countermeasure for short circuit testing in portable equipment and current limiting resistor.

Features :
- Rapid operation to protect the circuit in an overcurrent condition abnormality such as a short circuit. By removing the overcurrent condition, these products automatically return to the initial condition and can be used repeatedly.
- Stable resistance after operation due to ceramic PTC.
- 0603 SMD type for reflow soldering
- Lead is not contained in the terminations
- Operating temperature: -10°C to +60°C



RoHS Compliant

For quantities of 1000 and up, call for quote.

THERMOMETRICS Thermistors and Sensors

Products may be RoHS compliant.
Check mouser.com for RoHS status.

NTC THERMISTORS

NTC (Negative Temperature Coefficient) thermistors decrease in resistance as temperature increases. The maximum operating temperature is 150°C. Zero-power resistance values at 25°C range from 10Ω to 250KΩ; other values available upon request.

*Resistance tolerance is ±10%, except where denoted by an asterisk which is ±20%

INRUSH CURRENT LIMITERS

Limiters protect against extremely high peak inrush current, especially in AC/DC switching power supplies. These NTC thermistors effectively control surge currents because the thermal time constant of the current limiter is longer than the electrical time constant (RC) of the thermistor and the capacitor.

Also available, by special order, with kinked leads.

PTC THERMISTORS/ RESETTABLE FUSES

The values for dissipation constant and time constant listed in the table below are reference values. Actual values are a function of mounting, air flow and other factors which affect the PTC's (Positive Temperature Coefficient) ability to dissipate heat. Standard PTC's are supplied uninsulated, but can be supplied with an insulation upon request.

VISHAY Fuses and Thermistors

VISHAY / BEYSCHLAG FUSES

Thin Film Flat Chip Fuses

MFU 0603 and MFU 0805 Thin Film Flat Chip Fuses are the perfect choice for most fields of modern electronics The highly controlled thin film manufacturing process guarantees an outstanding stability of fusing characteristics.

Features :

- Advanced thin film technology
- Very quick acting fuse characteristics
- Outstanding stability of fusing characteristics
- Standard metric SMD sizes
- Green product, supports lead (Pb)-free soldering

Applications :

- Information technology
- Telecommunication
- Medical equipment
- Audio/video electronics

DIMENSIONS: in. (mm)

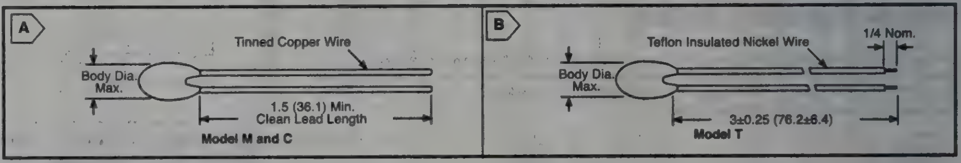
VISHAY / DALE NTC THERMISTORS

M, C, T Series NTC Coated Thermistors

DIMENSIONS: in. (mm)



Models M, C, and T are conformally coated, leaded thermistors for standard PC board mounting or assembly probes. The coating is baked-on phenolic for durability and long-term stability. Models M and C have tinned solid copper leads.

Features :

- Small size
- Wide resistance range
- Model T has solid nickel wires with Teflon® insulation to provide isolation when assembled in metal probes or housings.

For quantities of 1,000 and up, call for quote.

VISHAY / DALE NTHS SERIES NTC SURFACE MOUNT CHIP THERMISTORS

DIMENSIONS: in. (mm)

Features :

- Solderable terminations
- Wraparound terminations
- Allows design flexibility for use with hybrid circuitry
- High density monolithic construction
- Standard EIA E6 values
- Fully glass coated

For quantities of 1,000 and up, call for quote.

VISHAY COMPONENTS SMD Varistors and Thermistors

Products may be RoHS compliant.
Check mouser.com for RoHS status.

VISHAY BC COMPONENTS - NTC THERMISTORS, ACCURACY LINE

NTCLE - (Historical number 2322/pb version or 2381pbF 640 6XXXX) - Series

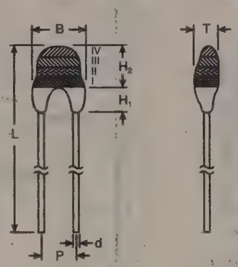
RoHS Compliant LEAD-FREE

DIMENSIONS: mm

Applications:
- Temperature sensing and control

Features:
- Accuracy over a wide temperature range
- High stability over a long life
- Excellent price/performance ratio
- Component in accordance to RoHS 2002/95/EC and WEEE 2002/96/EC

Specifications:
- Operating temperature range
  - at zero dissipation, continuously: -40 to 125°C
  - at zero dissipation, for short periods: 0 to 55°C
- Tolerance on $B_{25/85}$ -value: ±0.5% to ±3%
- Storage temperature range: -25 to +40°C
- Maximum relative humidity: 80%



NOTE 1: Dependent upon R_{25}-tolerance, the band IV is colored as follows:
- for R_{25} ±3%, Orange
- for R_{25} ±5%, Gold

Code Number 2381 640	B_{max}	d	H_2 min.	H_2 max.	H_2 max	L	P	T_{max}

VISHAY DALE TFPT SERIES LINEAR PTC THERMISTORS

DIMENSIONS: in. (mm)

Features:
- Solderable wraparound terminations
- Alumina substrate base with PTC thin film element
- Operating temperature: -55°C to + 125°C
- TCR Tolerance ppm °C is ±400

LEAD-FREE

RoHS Compliant

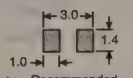
VISHAY BC 2322 675 2XXXX SERIES TEMPERATURE SENSING PTC'S

Features:
- Suitable for reflow and wave soldering
- Contact surfaces are made of Ag, Ni and an external layer of Sn
- Operating temperature range at maximum voltage: -25°C to Tn + 15°C
- Resistance at 25°C: 470Ω ± 50%
- Maximum voltage: 25V(dc or rms)



Recommended footprint (mm)

VISHAY BC 2322 661 97XXX SERIES PTC THERMISTORS FOR OVERLOAD PROTECTION

DIMENSIONS: mm

Features:
- Ideal for pick-and-place circuit assembly
- Low mounting height
- Suitable for reflow soldering
- Small ceramic diameter for faster response
- Low heat transfer to substrate
- Flat terminations for stable positioning and good solderability

Applications:
- Telecom
  - Set top box
  - Modems
  - Central office switching (C.O.)
  - Subscriber terminal equipment (T.E.)
  - Cable TV communications

XICON Thermal Cutoffs, Thermistors, and Surge Arrestors

Products may be RoHS compliant.
Check mouser.com for RoHS status.

2BN SERIES THERMAL CUTOFFS / THERMAL-LINKS

Features:
- Compact axial construction
- Highly insulated
- Fast, reliable operation
- Special alloy that contains no cadmium
- Also known as TCO's or Thermal Links

Applications:

Transformers
Solenoids
Gas home appliances
Ventilation fans
Fluorescent lighting
Electric fans
Second battery systems
Small electric motors
Chargers
Adapters
Heating devices
...and more

Principle of operation:
An abnormal temperature rise will cause the special resin used in the TCO to soften and liquefy. As the abnormal temperature rises above the melting point of the fusible alloy, the alloy melts and separates the lead wires. **Xicon Thermal Cutoffs will not reset;** the TCO must be replaced after the fault in the protected equipment is corrected.

RoHS Compliant

Definitions:
- Rated Temperature: the temperature at which a TCO completely opens
- Functioning Temperature: the temperature at which a TCO begins to open
- Holding Temperature: the temperature at which a TCO will conduct the rated current for 168 hours without opening.
- Max Operating Temperature: Maximum temperature at which the device will carry full operating current without opening.

NTC THERMISTORS

B constant signifies the dimensions of the resistance changes against a temperature between two optional temperatures.

- Temperature range: -20°C to +125°C
- Maximum power rating: 500mW (@ 25°C)
- Dissipation factor: 6mW/°C (@ 25°C)
- Heat resistant, and moisture proof
- Almost indefinite life

RoHS Compliant

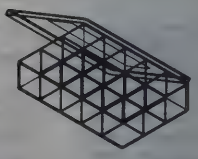
NTC THERMISTOR KIT

RoHS Compliant

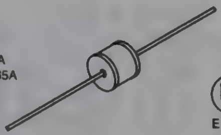


Contains 60 pieces
5 Each: 100, 200, 300, 500, 1K, 2K, 3K, 5K, 10K, 15K, 20K, 50K, Ω @ 25°C

MOUSER STOCK NO.	Price Each
370-NTC-T2-RC	29.95

GAS TUBE SURGE ARRESTORS

Features:
- Medium duty
- Two electrode
- Max. impulse discharge current (8/20μs): 10kA
- Max. AC discharge current (50Hz, 9 cycles): 65A
- Min. insulation resistance: 10^4MΩ
- Max. capacitance: 1.5pF
- AC(RMS) discharge current: 20A



E157510

For quantities of 1000 and up, call for quote.

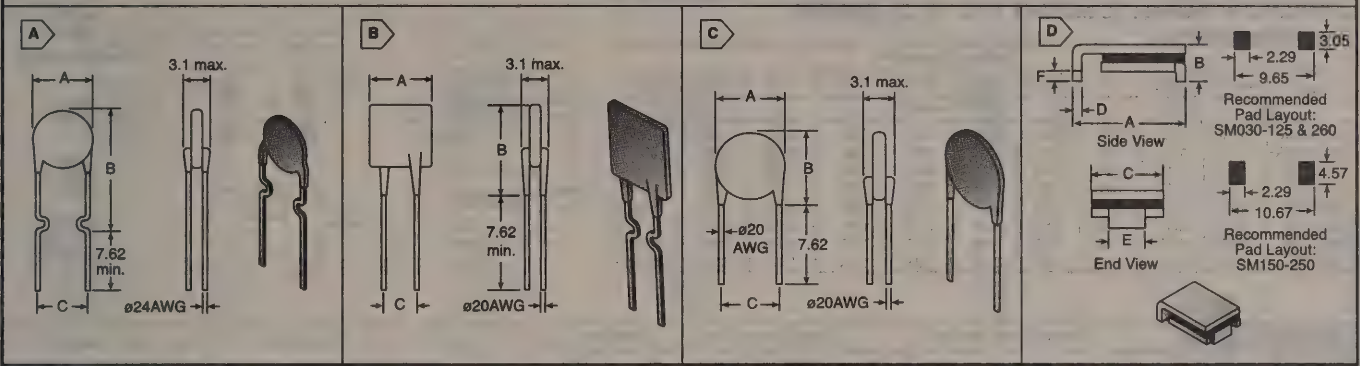
BOURNS *MultiFuse®* PTC Resettable Fuses

RoHS Compliant **This page of product is compliant.**

BOURNS® *Reliable Electronic Solutions*

DIMENSIONS: mm



MULTIFUSE® Resettable Fuses from Bourns are manufactured from a non-conductive crystalline polymer and a highly conductive carbon black. When the conductive plastic material is at normal room temperature, there are numerous carbon chains forming conductive paths through the material. Under fault conditions, excessive current flows through the material causing the temperature to rise and is accompanied by a small expansion. As the conductive particles move apart they no longer conduct current and the resistance of the device increases sharply. The material will stay "hot" as long as the power is applied. The device will remain latched, providing continuous protection, until the fault is cleared and the power is removed. The carbon chains will reform as the polymer re-crystallizes and the resistance quickly returns to its original value.

BOURNS® MF-R SERIES

Reliable Electronic Solutions

Features:

- Lead Free
- Radial leaded devices
- Cured, flame retardant epoxy polymer insulating material meets UL94V-0 requirements

Applications:

Almost anywhere there is a low voltage power supply and a load to be protected including:

- Computers and peripherals
- Automotive applications
- General electronics

RoHS Compliant

For quantities greater than 2000, call for quote.

BOURNS® MF-RX SERIES

Reliable Electronic Solutions

Features:

- Lead Free
- Radial leaded devices
- Cured, flame retardant epoxy polymer insulating material meets UL94V-0 requirements

Applications:

Almost anywhere there is a low voltage power supply, up to 60V and a load to be protected including:

- Security and fire alarm systems
- Power transformers
- Loud speakers

RoHS Compliant

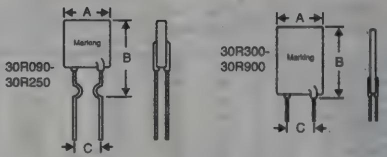
LITTELFUSE RADIAL LEADED PTC 30R SERIES

The 30R Series Resettable devices utilize a unique polymer-based, Positive Temperature Coefficient (PTC) material to protect electrical circuits against overcurrent conditions. In normal operation, the 30R Series PTC has many conductive paths and a very low resistance. In an overcurrent condition, the temperature of the polymer material rises. This dramatically reduces the conductive paths resulting in an immediate rise in resistance. In this condition, the device provides circuit protection by significantly limiting the flow of current. However, once the cause of the initial overcurrent condition is eliminated, the 30R Series PTC cools down and resets to a low resistance value permitting the normal current flow to resume.



For quantities of 500 or more, call for quote.

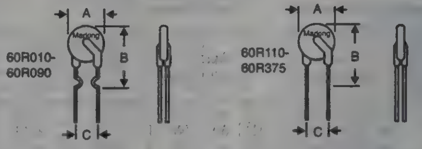
LITTELFUSE RADIAL LEADED PTC 60R SERIES

The 60R Series Resettable devices utilize a unique polymer-based, Positive Temperature Coefficient (PTC) material to protect electrical circuits against overcurrent conditions. In normal operation, the 30R Series PTC has many conductive paths and a very low resistance. In an overcurrent condition, the temperature of the polymer material rises. This dramatically reduces the conductive paths resulting in an immediate rise in resistance. In this condition, the device provides circuit protection by significantly limiting the flow of current. However, once the cause of the initial overcurrent condition is eliminated, the 60R Series PTC cools down and resets to a low resistance value permitting the normal current flow to resume.



For quantities of 500 or more, call for quote.

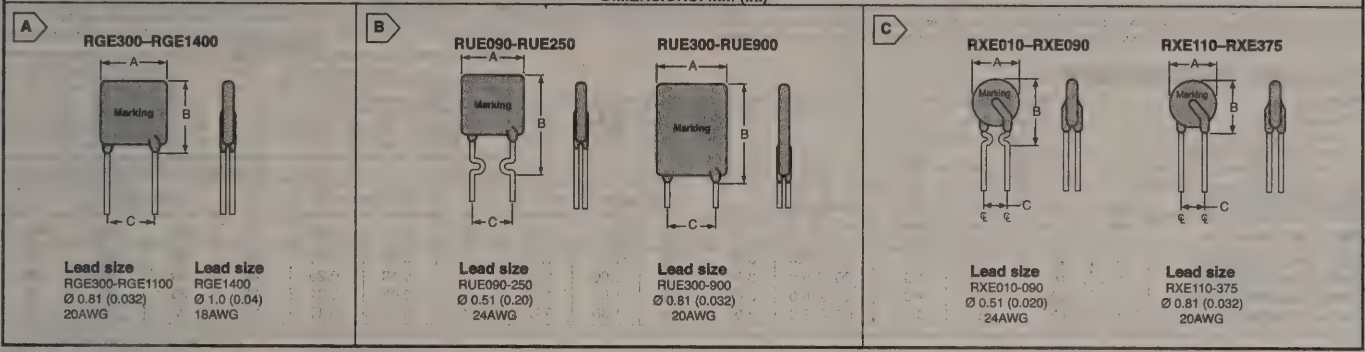
RAYCHEM PolySwitch Resettable Fuses

Tyco Electronics
Authorized Distributor

DIMENSIONS: mm (in.)



Raychem resettable fuses utilize a polymer based, positive temperature coefficient (PTC) material to protect electrical circuits against overcurrent conditions. In normal operations, the PTC has many conductive paths and a very low resistance. In overcurrent conditions, the temperature of the polymer material rises. This dramatically reduces the conductive paths resulting in an immediate rise in resistance. In this condition the device provides circuit protection by significantly limiting the flow of current. Once the cause of the initial overcurrent condition is eliminated, the PTC cools down and RESETS to a low resistance value permitting the normal current to resume.

RAYCHEM RGE SERIES

This product line can be used in a wide variety of automotive, computer and general electronics applications.
The RGE devices feature high current carrying capability (up to 14 amps) in a small package with fast trip times.

For quantities of 2000 and up, call for quote.

RAYCHEM RUE SERIES

These devices are designed to be used in a wide variety of general electronics applications.
RUE devices complement the RXE line by providing a smaller form factor with lower resistance and higher hold current capability (up to 9 amps).

For quantities of 2000 and up, call for quote.

RAYCHEM RXE SERIES

These products function as a general-purpose line of resettable fuses and are well suited for power supplies, alarm systems, speakers, motors, and many other applications.
Products range in hold currents from 0.10 amps to 3.75 amps and complement our RUE devices by providing a higher voltage rating.

For quantities of 2000 and up, call for quote.

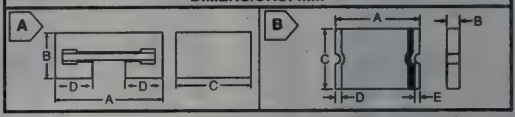
RAYCHEM PolySwitch Resettable Fuses

**Products may be RoHS compliant.
Check mouser.com for RoHS status.**

More than ten years ago, Raychem Circuit Protection introduced the SMD product family and polymeric PTC devices quickly became the computer industry standard for keyboard, mouse, and disk drive protection. In 1995, Raychem Circuit Protection advanced the technology, reducing the size and cost of surface-mount resettable devices with the introduction of its miniSMD product series. The recent additions to the surface mount family included the nanoSMD series, which reduces the size to a 3216mm (1206mils) footprint, one-third the size of the popular miniSMD series.

DIMENSIONS: mm



RAYCHEM NANOSMD SERIES

Features:

- Voltage rating 6V
- Agency recognition: UL, CSA, TUV
- Industry's fastest time to trip
- Industry's lowest-resistance device.

Applications:

- Battery Packs
- LCD Power Screen
- SCSI
- PS/2 mouser / keyboard

For quantities of 5000 and up, call for quote.

RAYCHEM SMD SERIES

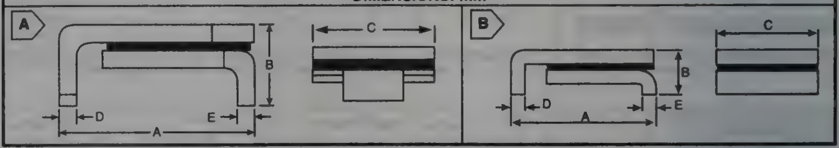
Features:

- Voltage rating from 6V to 60V
- Agency recognition: UL,CSA,TUV
- Industry's fastest time to trip
- Industry's lowest-resistance device

Applications:

- AC adapter input power
- LNB (Low Noise Block)
- Signal - data communication ≤30V
- IEEE 1394 Power Provider

DIMENSIONS: mm



For quantities of 5000 and up, call for quote.

RAYCHEM PolySwitch Resettable Fuses

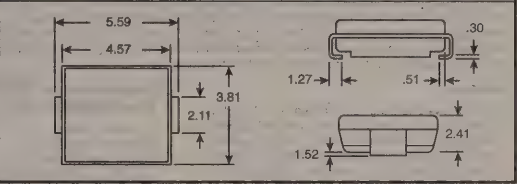
Products may be RoHS compliant.
Check mouser.com for RoHS status.

RAYCHEM TVB SERIES SIBAR THYRISTOR SURGE PROTECTORS

Features:

- Bidirectional transient voltage protection
- High off-state impedance
- Low on-state voltage
- Glass-passivated junctions
- Short-circuit failure mode
- Surface-mount technology

DIMENSIONS: mm



For quantities of 2000 and up, call for quote.

RAYCHEM LTP SERIES

Raychem's PolySwitch Strap Battery Resettable device offers overcurrent protection for rechargeable batteries at elevated temperatures. Made with weldable nickel terminals, and is fully compatible with current industry standards

Applications:

- Mobile phone battery packs
- Cordless phone battery packs
- Computer and PDA battery packs
- Camcorder battery packs

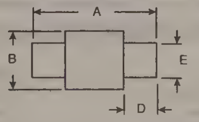
RAYCHEM SRP SERIES

Raychem's SRP Series offers the lowest resistance in ohm value when it comes to choosing a PolySwitch Resettable Device for your battery protection needs. The SRP can handle up to 30 volts DC with a trip rating of 7.6 amps.

Applications:

- Mobile phone battery packs
- Cordless phone battery packs
- Computer and PDA battery packs
- Camcorder battery packs

DIMENSIONS: mm



For quantities of 1000 and up, call for quote.

RAYCHEM PESD and SMD Chip Fuses

Tyco Electronics
Authorized Distributor

Products may be RoHS compliant.
Check mouser.com for RoHS status.

RAYCHEM POLYMER ESD PROTECTORS

Raychem PESD devices are designed for use in low capacitance applications, such as designs with high speed data transmission needs. The compact design offers board space savings and longer battery life due to low leakage current. Features include thick film technology, capacitance typically less than .2pF, low leakage current, trigger and clamping voltages, and a response time less than 1ns. These devices are capable of withstanding numerous ESD strikes and are compatible with standard reflow installation procedures.

Features:

- Storage and Operating Temperature: -40°C - +85°C
- ESD Pulse Withstand: 100 pulses min., 500 pulses typ. (tested per IEC 61000-4-2, level 4, contact method)
- ESD Voltage Capability (tested per IEC 6100-4-2)
- Contact Discharge Mode: 8kV typ., 15kV max.
- Air Discharge Mode: 15kV typ., 25kV max.
- ROHS Compliant
- ELV Compliant

Applications for 650-PESD0402-060 and 650-PESD0603-140:

- Cellular Phones
- Portable Devices
- High Speed Ethernet
- USB 2.0 and IEEE 1394 Interfaces
- Antennas
- Printer Ports
- DVI and HDMI Interfaces

Applications for 650-PESD1206Q-140:

- Portable Devices
- High Speed Ethernet
- USB 2.0 and IEEE 1394 Interfaces
- Printer Ports
- DVI and HDMI Interfaces

RAYCHEM FAST ACTING SMD CHIP FUSES

Features:

- Small size with high current ratings
- Excellent temperature stability
- High reliability and resilience
- Strong arc suppression characteristics

Features:

- Monolithic, multilayer design
- Lead-free construction
- High temperature performance
- -55° to +125°C operating range

Agency Approvals:

- UL File# E197536

Applications:

- Laptops
- Digital cameras
- Cell phones
- Printers
- DVD players
- Portable electronics
- Game systems
- LCD displays
- Scanners

AEM SMD Chip Fuses

RoHS Compliant This page of product is compliant.

AEM, INC.

SLOW BLOW SURFACE MOUNT FUSES

SolidMatrix® 0603

Features:
- Superior pulse tolerance capability
- Multilayer ceramic monolithic structure with silver fusing element
- Standard EIA0603/EIAJ1608 Size. (For 1206, change to Standard EIA1206/EIAJ3216 Size)
- Silver termination with nickel and tin plating, providing excellent solderability
- Compatible with lead-free soldering process
- Operating temperature: -55°C to 125°C (with de-rating)
- RoHS compliant materials

RoHS Compliant

For quantities of 100 and up, call for quote.

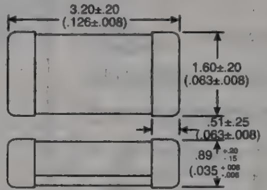
3216FF SERIES FAST-ACTING CHIP FUSES

Features:
- Protects against harmful overcurrents in secondary applications
- High inrush withstand capability
- Wire-in-Air performance
- Compatible with leaded and lead-free reflow and wave solder
- 1206 Package



For quantities of 500 or more, call for quote.

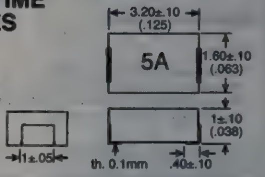
3216TDF SERIES TIME DELAY CHIP FUSES

Features:
- Surface mount fuse, fast acting
- Rapid interruption of excessive current
- Compatible with reflow and wave solder
- Excellent environmental integrity
- Ampere rating marked and oriented facing up in carrier
- Solder-free design provides excellent temperature cycling characteristics
- Heat and shock tolerant
- 1206 Package



For quantities of 500 or more, call for quote.

CHIP™ FUSES 0603FA SERIES, FAST ACTING

Features:
- Rapid interruption of excessive current
- Compatible with reflow and wave solder
- Rugged ceramic and glass construction
- Excellent environmental integrity
- One time positive disconnect
- Compatible with lead free solders and higher temperature profiles

COOPER / BUSSMANN SMD Fuses

RoHS Compliant This page of product is compliant.

COOPER Bussmann

COOPER Bussmann TCP™ SERIES TCP1.25A, TELECOM CIRCUIT PROTECTOR

Features:
- The first and most reliable surface mount telecom circuit protector designed to protect against power cross faults and comply with all surge requirements.
- Allows compliance with telecom regulatory standards including Bellcore GR 1089, UL 1950/60950, and FCC part 68. Application circuit testing is recommended.
- Eliminates the need for a current limiting resistor.
- Protects against overcurrent conditions found in telecom Subscriber Line Interface Cards (SLICs), xDSL Modem Applications, Set-Top Boxes, and Consumer Premises Equipment (CPE).

COOPER Bussmann TCP™ SERIES TCP500MA & TCP2A,TELECOM CIRCUIT PROTECTOR

Features:
- Designed to protect Consumer Premises Equipment from harmful overcurrents.
- Allows compliance with telecom regulatory standards including UL 1950/60950, and FCC part 68. Application circuit testing is recommended.
- Eliminates the need for a current limiting resistor.

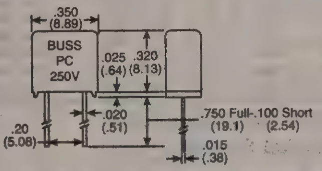
COOPER Bussmann PRINTED CIRCUIT BOARD FUSES (PC-TRON SERIES)

Features:
- Radial Leaded Fast Acting Thru-Hole Fuse
- Ideal for high voltage DC applications
- Board washable
- Optional mounting socket available (PCS)
- Available in different lead configurations



For quantities of 500 or more, call for quote.

COOPER BUSSMANN SUBMINIATURE SR-5 SERIES TIME LAG FUSES

Features:

- Radial Leaded Time Lag Thru-Hole Fuse
- Designed to IEC 60127-3, Sheet 4
- Internationally accepted for primary and secondary overcurrent protection
- Place directly into PCB or plug into BK/PCS holder
- High inrush withstand capability
- Compatible with leaded and lead-free reflow and wave solder
- Base/Cap is Nylon #66, UL 94V0
- Pins are Tin Plated Copper

RoHS Compliant

COOPER BUSSMANN SUBMINIATURE SR-5F SERIES FAST ACTING FUSES

Features:

- Radial Leaded Fast Acting Thru-Hole Fuse
- Designed to UL 248-14
- Accepted for primary and secondary overcurrent protection
- Place directly into PCB or plug into BK/PCS holder
- Compatible with leaded and lead-free reflow and wave solder
- Base/Cap is Nylon #66, UL 94V0
- Pins are Tin Plated Copper

RoHS Compliant

KEYSTONE FUSE HOLDERS AND CLIPS

PC Fuse Holders and Clips

- Auto blade holders and clips are compatible with Littelfuse .205" x .025" standard and .110" x .032" mini blade fuses, suitable for 15 amp applications .312" x .032" maxi blade fuses, suitable for 30 amp applications
- Thru hole PC mountable

RoHS Compliant

For quantities of 5000 and up, call for quote.

PC Fuse Clips

- Snap-fit and press fit designs for wave soldering
- Economical and easy to assemble
- Rivet mount design
- Low profile space saving design
- Low contact resistance
- Rivet mount design with solder lugs

RoHS Compliant

For quantities of 5000 and up, call for quote.

SMF OMNI-BLOK® FUSE HOLDER WITH FUSES

The SMF Omni-Blok® Fuseholder permits quick and easy replacement of Nano_® SMF surface mount fuses. The fuse block and pre-installed fuse combination can be placed on the PC board in one efficient manufacturing operation. Fuse replacement is accomplished without exposing the PC board to the detrimental effects of solder heat.

LITTELFUSE FUSE HOLDERS

In-Line Fuseholder for ATO® Fuses

RoHS Compliant

Specifications:

- Ambient temperature: -40°C to +85°C
- Body: Black thermoplastic
- Terminals: Brass, tin plated, snap into body

For quantities of 500 and up, call for quote.

MOUSER STOCK NO.	Littelfuse Part No.	Fig.	Description	Price Each

Fuse Blocks for Midget Series Fuses

Features:

- Fits .406" x 1.5" (10.31mm x 38.1mm)
- 600 Volt Rating
- Interlocking features allow multiple pole capability
- Max. Wire Size: Box lug #6cu, screw #10cu

For quantities of 1000 and up, call for quote.

571 SERIES PANEL MOUNT FUSE HOLDERS

Specifications:
- 4000 V dielectric strength
- Black Thermoplastic
- Fuse Diameter 13/32"
- Rejection Feature

RoHS Compliant

For quantities of 500 and up, call for quote.

CLASS T FUSE BLOCKS

Features:
- Bases are molded phenolic. To provide a low resistance connection and long-range reliability, steel reinforcing springs are supplied as standard. Larger blocks employ an integral heat sink for maximum heat dissipation.

E14721

LR73091

For quantities of 500 and up, call for quote.

BOURNS Chip Resistor Arrays

BOURNS
Reliable Electronic Solutions

RoHS Compliant This page of product is compliant.

BOURNS CONCAVE AND CONVEX TERMINATION CHIP RESISTOR ARRAYS, LEAD FREE

Features:
- Lead free version
- Concave and convex termination style
- Resistance tolerance ±5 %
- Suitable for most types of soldering processes

RoHS Compliant

Specifications:
- Operating temperature range: -55°C to +125°C

CAT10, CAY10:
- Package power rating @ 70°C: 125 mW (J4), 63 mW (J2)
- CAT 10: insulated resistors in 0804 size package
- CAY 10: 2/4 isolated resistors in 0404/0804 size package

CAT16, CAY16:
- Power rating per resistor: 62 mW
- Number of elements (isolated): 4 (J4LF), 2 (J2LF)

BOURNS Thin Film on Silicon Isolated Resistors

Reliable Electronic Solutions

2QSP/2NBS-XX1 SERIES ISOLATED

Isolated resistor networks are commonly used in digital circuits where series resistors are required on the system bus. Fabricated with Tantalum Nitride and Nickel Chromium technology on Silicon, these resistors feature excellent stability, TCR and tracking performance. This product series is available in a range of miniature package types conforming to JEDEC standards.

Features:

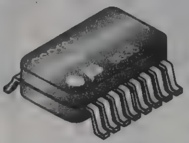
- Multiple isolated resistors
- Stable thin-film-on-silicon technology
- Ultra-miniature packages to JEDEC standards

Applications:

- Pull-up/pull-down
- Ideal for space-constrained applications

Electrical Characteristics:

- Max. TCR: 150 ppm/°C
- Max. Operating Voltage: 50V
- Operating Temperature: -55/+125°C



RoHS Compliant

BOURNS Thin Film on Silicon Bussed Resistors

Reliable Electronic Solutions

2QSP/2NBS-XX2 SERIES BUSSE D

Bussed Resistor networks are typically used in DC pull-up and pull-down applications where system data of control lines must be tied to a fixed potential. Fabricated with a tantalum Nitride and Nickel Chromium on Silicon process, these resistors feature excellent stability, TCR and tracking performance. Bussed resistor networks are available in a range of miniature package types conforming to JEDEC standards.

Features:

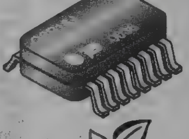
- Multiple isolated resistors
- Stable thin-film-on-silicon technology
- Ultra-miniature packages to JEDEC standards

Applications:

- Pull-up/pull-down
- Ideal for space-constrained applications

Electrical Characteristics:

- Max. TCR: 150 ppm/°C
- Max. Operating Voltage: 50V
- Operating Temperature: -55/+125°C



RoHS Compliant

BOURNS 2% SMD Thick Film Resistor Networks

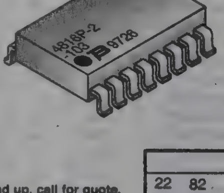
Reliable Electronic Solutions

4800P SERIES

Specifications:

- Maximum Operating Voltage: 50V
- Temperature Coefficient of Resistance: 50Ω and above = ±100ppm/°C below 50Ω = ±250ppm/°C
- Operating Temperature: -55°C to +125°C
- Insulation Resistance: 10,000 MΩ min.
- Dielectric Withstanding Voltage: 200 VRMS
- Package Power Rating at 70°C: 4816P: 1.28 watts
- Resistor Tolerance: 10 Ω to 49 Ω = ±1 Ω, 50 Ω to 5 MΩ = ±2%

RoHS Compliant



4816P-2
103
8728

Features:

- Standard E.I.A. package compatible with automatic placement equipment
- Standard Packaging 50 per tube
- Marking on contrasting background for permanent identification
- Compliant leads to reduce solder joint fatiguing
- Standard electrical schematics: isolated, bussed

BOURNS 2% SIP Thick Film Resistor Networks

Reliable Electronic Solutions

4300R SERIES

Specifications:

- Molded construction
- Resistance range: 10Ω to 1MΩ
- Temperature coefficient of resistance:
  - 50Ω to 1M = ±100 ppm/°C
  - < 50Ω = ±250 ppm/°C
  - > 1MΩ = ±250 ppm/°C
- Resistor Tolerance:
  - 10 Ω to 49 Ω = ±1 ohm
  - 50 Ω to 5 MΩ = ±2%
- Package Power Rating at 70°C
  - 4306R: 0.75 watts
  - 4308R: 1.00 watts
  - 4310R: 1.25 watts

BOURNS 2% SIP Conformal Coated Resistor Networks

Reliable Electronic Solutions

4600X SERIES

Specifications:

- Standard resistance range: 22Ω to 1MΩ
- Standard resistance tolerance: 50Ω-5MΩ ±2% <49Ω=1Ω)
- Operating temperature range: -55°C to +125°C
- Temperature coefficient of resistance: ±100ppm/°C (<50Ω = ±250ppm/°C)
- Operating voltage: 100VDC max.
- Insulation resistance: 10,000MΩ min.
- Resistor Tolerance: 10 Ω to 49 Ω = ±1 Ω, 50 Ω to 5, MΩ = ±2%

Features:

- Low profile is compatible with dips
- Ammo-pak packaging available
- Recommended for rosin flux, and solvent clean or no clean flux process

KOA 0402, 0603, 0805, 1206 - 5% SMD Resistor Array

KOA
KOA SPEER ELECTRONICS, INC.

RoHS Compliant **This page of product is compliant.**

KOA SPEER 5% CONCAVE TERMINATION RESISTOR ARRAYS

Features:
- Manufactured to type RK73 standards
- Less board space than individual chips
- Isolated resistor elements
- Marking: Marked with resistance value
- Tolerance: 5%
- Operating temperature range: -55°C to +150°C

RoHS Compliant

KOA SPEER 5% CONVEX TERMINATION RESISTOR ARRAYS

Features:
- Manufactured to type RK73 standards
- Less board space than individual chips
- Isolated resistor elements
- Convex terminators with square corners
- Marking: Body color black
  1E no marking
  1J white three-digit marking

Specifications:
- TCR: ±200
- Power Rating: 63mW
- Resistance Tolerance: 5%
- Operating Temperature Range: -55°C to +125°C

RoHS Compliant

VISHAY Thin Film Dual In-Line Resistor Networks

VISHAY

VSSR AND VSOR SERIES-RESISTOR NETWORKS - THIN FILM NITRIDE ON SILICON

Features:
- Surface mount compatible
- TCR-Absolute: -55°C to +125°C
- Choice of package sizes: VTSR (TSSOP) JEDEC MC-153, VSSR (SSOP or QSOP) JEDEC MS-137, VSOR (SOIC narrow) JEDEC MS-012
- Moisture sensitivity level 1 (per IPC/JEDEC STD-20C)

Application for Resistors w/ one Pin Common/Bussed:
- MOS/ROM Pull-up/Pull-down
- TTL Input Pull-down
- Open Collector Pull-up
- Digital Pulse Squaring
- TTL Unused Gate Pull-up
- Power Driven Pull-up
- High Speed Parallels Pull-up

Applications for Isolated Resistors:
- Power Driven Pull-up
- LED Current Limiting
- Powergate Pull-up
- ECL Output Pull-down
- Line Termination
- TTL Input Pull-down

RoHS Compliant

VISHAY / THIN FILM High Precision 8 Pin Resistor Networks/Dividers

VISHAY

ORN AND ORNA SERIES - DUAL-IN-LINE NETWORKS AND DIVIDERS

Features:

- Standard divider resistor ratios from 1:1 to 100:1
- Ratio match tolerance to 0.01%
- TC tracking of ± 2 ppm
- Standard 8 pin JEDEC MS-012 footprint

Applications:

- Differential amplifiers
- Precision voltage dividers
- Bridge networks circuitry

VISHAY / SFERNICE High Precision Resistor Arrays

VISHAY

PRA 100, 182 SERIES

Features:

- 100mW Resistor
- Packaged in waffle - Tape and reel available
- High stability passivated nichrome resistive layer 0.02% on ratio 1000h at Pn at 70°C
- Tight TCR (10 ppm/°C) and TCR tracking (to 1ppm/°C)
- Very low noise <35dB and voltage coefficient <.01ppm/V
- Ratio tolerance from .1% to .01% (R≥20R)
- Pre-tinned terminations over nickel barrier
- Also available: One common point N Resistor
- Absolute Tolerance: .1%
- Ratio Tolerance: .05%

RoHS Compliant

Independent Resistors

VISHAY / DALE 2% Thick Film Resistor Networks

MDP SERIES - MOLDED DIP RESISTOR NETWORKS

Features:
- Dual-in-line, molded DIP
- .160" [4.06mm] maximum seated height
- Rugged, molded case construction
- Low temperature coefficient (-55°C to +125°C) ±100PPM/°C

Electrical Specifications:
- Tolerance: ±2% standard
- Temperature coefficient: -55°C to +125°C

RoHS Compliant

4 Digit Resistance Value Chart = First 3 digits are significant figures and the last digit specifies the number of zeroes to follow. Example: 1002 =10K, 10R0 = 10 ohm

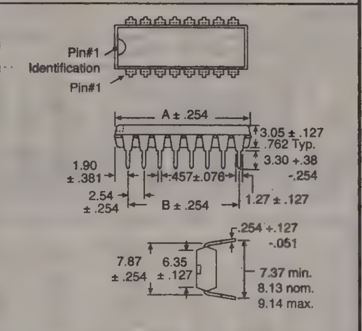
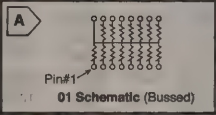
DIMENSIONS: mm

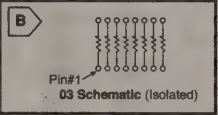


Non-Accumulative Tol. "C" Spaces

SOMC SERIES - MOLDED, SURFACE MOUNT COMPATIBLE



01 Schematic (Bussed)



03 Schematic (Isolated)

Features:
- .050" [1.27mm] lead spacing
- .090" [2.29mm] maximum seated height
- Highly stable thick film
- Low temperature coefficient (-55°C to +125°C) ±100PPM/°C
- Reduces total assembly costs
- Wide resistance range available
- Uniform performance characteristics
- Meets EIA PDP100, SOGN-0002 outline dimensions

Electrical Specifications:
- Resistance range: 10 ohm to 1 Megohm standard. Zero ohm jumpers available.
- Tolerance: ±1%, ±5%, ±10%, ±20% available.
- Temperature coefficient: (-55°C to +125°C) ±100PPM/°C typical
- Resistor power rating: 70°C max.
  01 Schematics = .080W; 03 Schematic = .160W
- Operating temperature range: -55°C to +125°C

Available in 14 and 20 pin style, additional resistance values, in isolated and bussed styles.

VISHAY / DALE 2% SIP Thick Film Resistor Networks

CSC SERIES - 2% CONFORMAL COATED SIP RESISTOR NETWORKS

Features:
- .195 (4.95mm) "A"
- "A" profile standard in 6 thru 10 pins

Specifications:
- Operating temperature range: -55°C to +125°C
- Temperature coefficient of resistance: (-55°C to +125°C) ±100ppm/°C typical
- Operating voltage: 100VDC max.
- Resistor power rating: (max. @ +70°C) fig. A .125W, fig. B .20W

DIMENSIONS: mm

IRC 0805, 1206-0.1% 25 PPM SMD Thin Film Resistors

PFC SERIES TANFILM

Features:

- Available in 0603, 0805, 1206
- Passivated TaNFilm element
- Wrap-around termination
- Temperature Coefficient = 25ppm
- Tolerance= 0.1%
- Leach resistant nickel barrier termination

RoHS Compliant

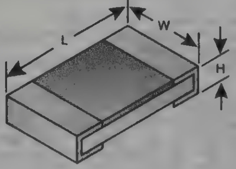
IRC 1206, 2010, 2512-1% SMD Current Sense Resistors-1/2, 1 and 2 Watt

LR SERIES

Features:

- Resistance values down to .003 ohms
- Leach resistant solder-plated cooper wrap-around termination
- Low inductance-less than 0.2nH



DIMENSIONS: in.

IRC 1% SMD Metal Element Current Sensing Resistors

ULR SERIES

Features:

- Designed for current sense circuits in power electronics systems
- Power Ratings: 1W to 3W in 2512 chip size
- Resistance Range: 0.5mΩ to 10mΩ
- Low TCR and inductance
- Higher wattage devices feature PCB clearance gap to maximize thermal performance
- Tolerance: ±1%

RoHS Compliant

NEW FROM SUPPLIER

IRC 1% and 5% SMD Current Sensing Resistors

OAR-XP SERIES - 1% OPEN AIR SENSE RESISTORS

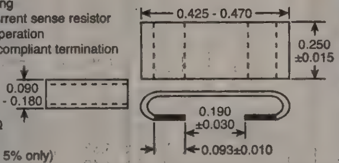
NEW FROM SUPPLIER

Features:

- Superior Thermal Expansion Cycling
- Extended power surface mount current sense resistor
- Open air design provides cooler operation
- Unique form factor provides TCE compliant termination
- Zero Ω Jumper available

Specifications:

- Power Rating: 3-5 Watts
- Resistance Values: 2mΩ to 50mΩ
- Inductance: <10nH
- Tolerance: ±1% or ±5% (0.002Ω - 5% only)



RoHS Compliant

DIMENSIONS: mm

For quantities of 2000 and up, call for quote.

OARS SERIES - 5% OPEN AIR SENSE RESISTORS

Features:

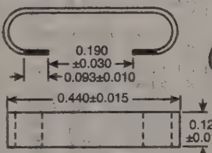
- Superior Thermal Expansion Cycling
- Inductance ≤ 10nH
- Lead Flexible for Thermal Expansion

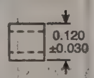
Operating Characteristics:

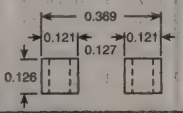
- Load Life @ 70°C (1000 hrs): 1% D Max.
- Moisture No Load (1000 hrs): 1% D Max.
- Temperature Cycle @ -40°C & +125°C (1000 cyc): 1% Max.

Specifications:

- Tolerance: ±5%
- Resistance Wire TCR ±20ppm/°C
- 50V Continuous Pulse Rating/Rated Voltage







RoHS Compliant

DIMENSIONS: mm

For quantities of 3800 and up, call for quote.

IRC 10% SMD Surge Resistors

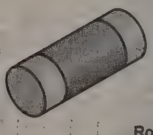
HSF-1 SERIES

Specifications:

- Size Code: F
- Industry Footprint: 2512
- Maximum Power Rating: 1W @ 70°C
- Working Wattage: 350
- Tolerance: ±10%
- TCR (ppm/°C): ±50, ±100

Features:

- Up to triple the surge rating of the rugged CHP1
- Replaces costly surface-mount wirewound resistors
- 150°C maximum operating temperature
- 1 Watt power rating



RoHS Compliant

For quantities of 2000 and up, call for quote.

IRC SMD Jumper Resistors

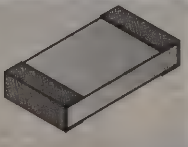
LRZ SERIES - ULTRA LOW RESISTANCE

Specifications:

- High Current Rating
- Less than 0.003Ω Resistance
- Copper on Alumina construction
- Very Low Inductance
- Available in 1206, 2010, and 2512 chip sizes

NEW FROM SUPPLIER

RoHS Compliant



For quantities of 3000 and up, call for quote.

KOA 0402-2512 SMD Lo-Ohm Current Sense Resistors

RoHS Compliant This page of product is compliant.

SR73 SERIES - THICK FILM 0402, 0603, 0805, 1206, 1210, 2010, 2512

Features:

- RuO2 thick film resistor element
- Anti-leaching nickel barrier terminations
- Meets or exceeds EIA 575, EIA PDP-100, MIL-R-55342F
- Marking: Three or four-digits on indigo protective coat. No marking, 1E size.

RoHS Compliant

KOA SMD Molded Current Sense Resistors

KOA SPEER ELECTRONICS, INC.

SL AND TSL SERIES RESISTORS

RoHS Compliant **This page of product is compliant.**

Features:

- Surface mount type
- Flameproof UL94-V-O molded polymer case
- Excellent dimension accuracy, mountability and shock resistance
- Suitable for flow, reflow and hand soldering
- Resistance Tolerance: 1%
- Operating Temperature Range: -55°C to +180°C
- 1000 Piece Reels

RoHS Compliant

TLR AND UR73 SERIES CURRENT SENSING RESISTORS

Features for TLR:

- Metal plate current sensing
- Metal alloy, superior corrosion and heat resistance
- Applications include current sensing, voltage division and pulse applications
- Ultra low resistance (1mΩ-20mΩ)
- Marking: Black body color with marking (3A and 2B only) (3AW: 1mΩ only)

Features for UR73:

- Very low resistance, high precision reliability
- Suitable for reflow and flow soldering
- Utilization of thick film
- Low T.C.R. achieved (±100 ppm/°C)
- Marking: Indigo body color with white marking

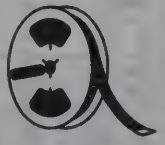
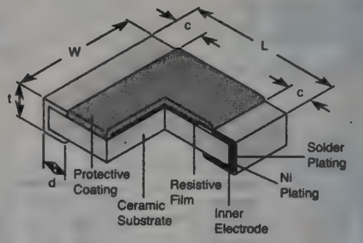
RK73H SERIES - THICK FILM

RoHS Compliant This page of product is compliant.

Features:
- RuO2 thick film resistor element
- Anti-leaching nickel barrier terminations
- Also available with epoxy bondable palladium silver terminations in 2A and 2B sizes
- Meets or exceeds EIA 575, EIAJ RC 2690A, EIA PDP-100, MIL-R-55342F
- Marking: Four-digit black on blue protective coat. No marking on 1H and 1E size. Three-digit on 1J size, E-24 values only.
- Operating temperature: -55°C to +155°C
- TCR (ppm/°C) max = ±100ppm

RoHS Compliant





Available in various tolerances, case sizes, and 10PPM and 50PPM.
Contact a Mouser Sales Representative for more information.

KOA 0402, 0603, 0805, 1206, 1210, 2010 & 2512 - 1% Resistors

KOA SPEER ELECTRONICS, INC.

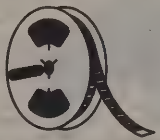
RK73H SERIES - THICK FILM (CONT.)

RoHS Compliant **This page of product is compliant.**

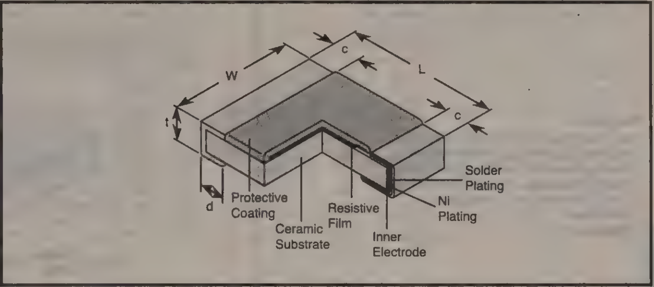
Features:

- RuO2 thick film resistor element
- Anti-leaching nickel barrier terminations
- Also available with epoxy bondable palladium silver terminations in 2A and 2B sizes
- Meets or exceeds EIA 575, EIAJ RC 2690A, EIA PDP-100, MIL-R-55342F
- Marking: Four-digit black on blue protective coat. No marking on 1H and 1E size. Three-digit on 1J size, E-24 values only.
- Operating temperature: -55°C to +155°C
- TCR(ppm/°C) max: ±100ppm

RoHS Compliant



Available in various tolerances, case sizes, and 10PPM and 50PPM. Contact a Mouser Sales Representative for more information.



Type (Inch Size Code)	Power Rating	Dimensions: mm				
		L	W	c	d	t
1E 0402	1/16W	1	0.5±0.05	0.2±0.1	0.25	0.35±0.05

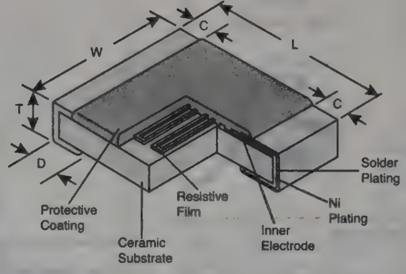
KOA 0603, 0805, 1206 - 0.1% 25ppm Resistors

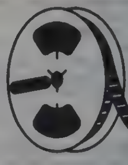
This page of product is compliant.

RN73 SERIES - THIN FILM

Features:
- Nickel chromium thin film resistor element
- Anti-leaching nickel barrier terminations
- Meets or exceeds EIA 576, MIL-R-55342F
- Marking: Four-digit, distinctive color identifiers (Only E-24 values are marked on 1J)
- TCR: 25ppm
- Tolerance: 0.1%

RoHS Compliant





Available in various tolerances, case sizes, and 10PPM and 50PPM.
Contact a Mouser Sales Representative for more information.

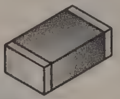
VISHAY / DALE 0402, 0603, 0805, 1206, 2010, 2512 - 1% Resistors

CRCW SERIES - THICK FILM - 1% SMT RESISTORS



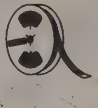
Available in Reels

Specifications:

- Resistance tolerance: ±1%
- Operating temperature: -55°C to +150°C
- Temperature coefficient: ±100ppm
- Cut Tape and Reels available
- Industry standard sizes

RoHS Compliant

LEAD-FREE



†These are stocked values, other E-96 values available, call (800) 346-6873 for more details.

Insert **Value Code** from Table of Stocked Values

For quantities greater than 2000, call for quote.

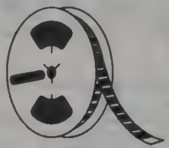
VISHAY / DALE 0603, 0805, 1206 - 0.1% 25ppm Resistors

TNPW SERIES - THIN FILM RECTANGULAR, RESISTOR CHIP

Features:

- Metal film layer on high quality ceramic
- Protective top coat
- Excellent stability at different environmental conditions
- Low TC and tight tolerances
- TRC: 25ppm
- Tolerance: 0.1%



Applications:

- Automotive
- Telecommunications
- Medical Equipment
- Industrial Equipment

LEAD-FREE RoHS Compliant
